

Simon XT Talking Touchpad

OVERVIEW

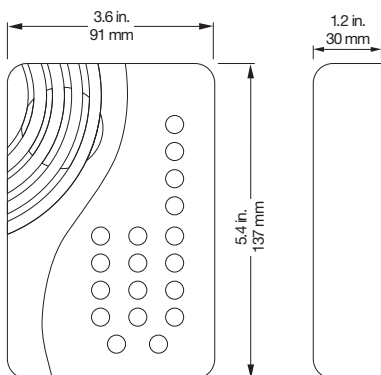

The Simon XT® talking touchpad is an alkaline-battery-operated, wall-mounted touchpad that extends the physical accessibility and basic system operation of a Simon XT security system. Ideal for systems where more than one control point is desired, the touchpad provides auxiliary control in residential applications with multiple levels or multiple entry and exit points. Installed within 100 ft. (30 m) of the panel, the talking touchpad allows the user to enter commands and hear feedback from the panel.

STANDARD FEATURES

Compatible with Simon XT security system version 1.2 and later, the touchpad provides a convenient option for the following remote system operations:

- Arming the system, including doors, windows and motions sensors
- Arming the system with no entry delay
- Disarming the system
- Activating a panic alarm to call the central monitoring station for a non-medical emergency
- Checking system status
- Hearing the voice feedback from the Simon XT control panel
