Complete solutions for commercial security

Verex delivers leading intrusion, access and video products to protect today's companies

Scalable, cost-effective security designed for today's businesses

Designed for flexible implementation to meet the needs of small to mid-sized commercial applications, the Verex platform easily integrates intrusion, access and video solutions to accommodate growth and changing priorities.

Backed by the advanced technology found across the Interlogix portfolio, Verex systems provide the ideal fit for multiple environments:

· Banks and financial institutions
· K-12 schools
· Retail stores
· Office buildings
· Healthcare facilities
· Manufacturing and warehouses
· Utilities
· Apartment complexes

Intrusion Protection

From simple, stand-alone applications to complex, multi-site installations, Verex expands to meet current and future needs.

Verex provides a broad array of leading intrusion protection solutions equipped with key features to enhance convenience, safety and security while reducing false alarms. Verex systems monitor critical points and events, and take programmed protective actions including first-responder notification via secure line, email or text.

· Wired and wireless sensors

· Remote arming stations

· Integrated keypad with reader

· Disaster recovery

· Visual graphic maps

· Off, Stay, Arm with various time and command control

· Interlock and Mantraps

· Supervisor plus second user

· Guard tours

· Panic RF tokens

· IP, dial-up, serial or cellular connectivity options

Complete management control

Using a simple interface that can be accessed locally or remotely, multiple buildings can be managed concurrently for optimum security:

· Monitor live events or review history

· Manually lock/unlock doors as needed

· Run reports and backups

· Trigger events/programs

· Send messages to individual or multiple-suite LCD keypads

Access Control and Identification

Having access control integrated with the security system facilitates easy operation.

Whether an application requires control of a single door or hundreds of doors, the Verex platform can accommodate expanding needs. Users can scale Verex access control systems from small to mid-size applications of up to 1,920+ doors per site when networked. Verex optimizes accessibility and movement of authorized people throughout facilities.

The robust access control provided by Verex enables many advanced features usually found in high-end enterprise-level systems:

· Disaster recovery

· Elevator controllers

· Anti-passback, timed

· Activity monitoring to support auto-arming applications

· Visitor processing

· Minimization of patient wandering in hospital and long-term-care facility applications

· Dual custody (access control) with two valid users required to access the area via valid token

· Multiple authorities by combining intrusion and access control privileges

· Card only, PIN only, card + PIN (time scheduled)

· Attendance reports

· Roll call

· User in/out status tracking by area, building and by time

· Reader integrated keypads

· Card lost/void tracking

Leading identification technologies

Verex delivers robust security with a wide range of ID technologies, all of which can be incorporated to provide the desired level of security:

· Magnetic stripe

· Smart card/MIFARE

· Proximity

· Biometric including fingerprint, iris, hand and facial geometry

Digital Video Surveillance

Verex Director software integrates video with intrusion and access control into a single, intuitive user interface.

This easy-to-use software solution captures and tags video in response to alarms or events, alerting personnel to view live or recorded video from anywhere in the world. From a single camera to a large, multi-camera distributed network, Verex Director has you covered.
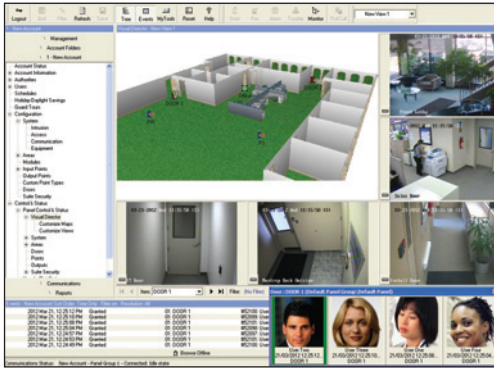

Seamless video integration

Director management software allows users to monitor video events with intrusion and access from a single screen, eliminating the need for multiple management tools. Providing a flexible migration path, Director seamlessly integrates with Interlogix TruVision® recorders and cameras without the need for separate licensing and management.

TruVision delivers seamless compatibility

The TruVision product line from Interlogix includes cameras, monitors and recorders well suited for commercial environments. Verex is compatible with all TruVision DVRs and provides the ability to easily view live and recorded video. Ideal for indoor and outdoor applications, TruVision products provide flexible video management solutions that can be scaled to fit a variety of commercial applications.

Straightforward Management Reporting

Keep track of what's happening by using any of the detailed built-in reports or create custom-designed reports for things like:

- **Auditing Operator Activity** - what system changes were made by whom, when and where
- **Event Reports** - what happened, where and at what time
- **Door Activity** - select a door to view all of the activity at it
- **Personnel Tracking** - track the activities of a selected user
- **Attendance** - confirm that the employee was in the area they said they were

Verex's comprehensive solutions are developed and supported by Interlogix, a leading provider of security and life safety solutions including integrated systems and advanced video technology. Through an ongoing commitment to secure and protect people, property and assets, Interlogix continues to develop innovative and reliable products that meet the demands of the modern world.
