NetworX Advanced Touch LED Keypads

OVERVIEW

An essential part of any residential or commercial security system, the NetworX Advanced Touch LED keypad brings together powerful protection and user-friendly features in a compact design. Individually lit, color-coded Touch Response Keys and a Personal Voice Guide (PVG) that provides step-by-step instruction for all system functions make this keypad simple and easy to program and control.

Users can record their own names for different system components and leave voice messages for others, while voice-enabled status keys eliminate the need to decipher confusing flashing lights. Intercom functionality allows users to talk with each other from up to eight different locations around the premises.
