Section 1: Programming Record (Formerly Appendix A)

Before you begin programming, use this form to mark the selections you wish to make. Circle the appropriate answer for each option or fill in the blanks where necessary. The programming procedures for the built-in programmer and Model 5540 Downloading software are explained in the *4724 Installation Manual (P/N 150596-02)*.

NOTE We recommend that you use a pencil to fill in this form, so that options can be easily changed.

For your convenience, the Text and Characters Table, which shows the keystrokes needed for entering text, is reprinted below. There is no need to do anything with it while you are completing the programming record. However, you may find it helpful to refer to it while you are programming some of the options (see Section 6.5.1 of the *4724 Installation Manual, P/N 150596-02*).

Section 2: Time Windows (Menu 0)

For each time window you want to program, write the starting and ending times. Circle the days of the week that the time window will be in effect (H = holiday).

Section 3: Access Options (Menu 1)

For each code, circle the functions available for that user. In the designated spaces, write the secret code, the areas to which the user has access, and the window group that specifies times during which the code can be used.

NOTE Secret codes can also be programmed in the **7 TEST** menu. See the 4724 Installation Manual (P/N 150596-02) for details on programming secret codes.

NOTE If **HIGH SECURITY** access was selected, Code #255 will be the high-security code.
