## **KTD-138**

*Auxiliary Function Receiver*

### **Overview**

The KTD-138 is a small, economical indoor receiver that controls auxiliary functions in a Digiplex® system. It contains four double-pole relays that can be used to carry out various functions such as operating doors, turning on lamps, or switching balanced audio to a single bus line. The wall-mountable unit is packaged in a small aluminum case that features slotted mounting tabs for easy installation. All relays and ICs are socketed for easy removal and replacement.

### **Outstanding Features**

The KTD-138 is controlled through twisted-pair cable from one or more remote Digiplex keypads. All wiring connections are made on a removable terminal strip.

Note: The KTD-138 must be programmed at the factory for specific key-to-relay assignment. To expedite processing, please contact GE Security before submitting orders for receivers in this category.

### **Standard Features**

- **Low-cost receiver**
- **Four 1-A double-pole relays**
- **Removable terminal strip**
- **Small, easy-to-mount case**

# KTD-138

## Auxiliary Function Receiver

### Specifications

#### Electrical

- Input voltage: 9 VAC/12 VDC, 50 to 60 Hz
- Input power: 5.5 VA
- Input data signal: RS422
- Function relays type: DPDT dry contact
- Function relays contact rating: 1.0 A @ 30 VDC

#### Function Relays

- Four normally open double-pole dry contact relays switchable to a common output. See figure below.

#### Controls

- Site select: Multiposition DIP switch

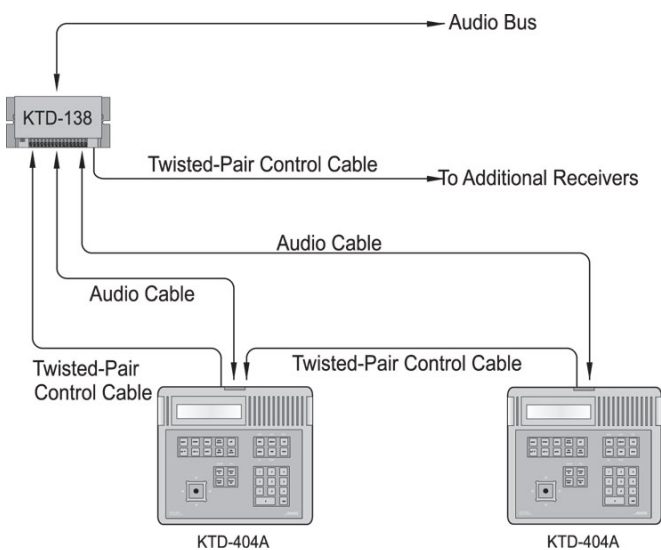

#### Connections

- 16-position removable terminal strip

#### Mechanical

- Weight: 6.4 oz (181 g)
- Material: 0.050 in (1.27 mm) aluminum
- Finish: Black anodized
