Contact Information	1

Introduction

This document specifies the differences and fixes introduced by the bug fix release **1.72.99**, as compared to the previous revision **1.72.96**. This document is an annex to the release note document “**Release_Notes_1.72.96.pdf**” which should be read first.

All the sections of the document “**Release_Notes_1.72.96.pdf**” remain unchanged, except for the “New Features & Updates” and “Resolved Issues”, which are updated below.

New Features and Updates

TruPortal 1.72.99 includes the following new features:

- Panel security has been improved:
 - SSH server (dropbear) has been disabled by default, available only in on demand
 - SSH server (dropbear) has been updated to the latest revision
- Plugin system has been extended to support new GUI plugins
- New HTML GUI is supported as a plugin (see folder “Plugins/HTML UI plugin” in the release zip package).
 The new GUI is functionally equivalent to the old one, but the web browser does not need to support FLASH player plugin any longer. New GUI is available at the address “**https:// [panel IP or name] /htmlui**”, once the plugin is installed.
 Old GUI is still available (unchanged), at the address “**https:// [panel IP or name]**”
- OnGuard Migration Wizard application now supports migration to OnGuard revision 7.3

Resolved Issues

The following issues have been resolved for TruPortal v.1.72.99:

- If more than 4 elevators configured, for access levels id greater than 32 access control didn’t work properly
