Simon *XT* and Two-Way Talking Touch Screen Kits

OVERVIEW

The Simon *XT*® Two-Way Talking Touch Screen Kits are well-suited for users who desire additional keypad accessibility with lifestyle management features—either in the home or with optional remote capabilities via the Web. The Simon *XT* security control panel offers traditional security features such as arming and disarming the security system. In addition, remote accessories such as the Two-Way Talking Touch Screen, Door/Window sensors, PIR, key fob, and optional GSM module work seamlessly with Alarm.com interactive services and mobile applications for remote access and control.

The Two-Way Talking Touch Screen interface communicates with the Simon *XT* panel to provide status information at a glance from any room in the home. This convenient, all-in-one interface expands Simon *XT*'s functionality to provide wireless operation of security and other home systems. The optional GSM wireless module, with Alarm.com and mobile applications, provide additional lifestyle-enhancing information such as current outdoor temperature, four-day weather forecast, lighting, and thermostatic control for energy savings.

• Advanced interactive services through Alarm.com
  — Four-day forecast for quick, convenient weather planning
  — Programmable thermostats and lighting promotes energy savings with added security
• Extended capabilities with kit accessories for added convenience and protection

Simon *XT* and Two-Way Talking Touch Screen Kits

Simon *XT* Talking Touch Screen Kit

Simon *XT* Panel (1)

The Simon *XT*® panel offers security features such as arming and disarming, two-way communication, easy-to-read and user-friendly display, and a wireless design for quick and easy installation.

Two-Way Talking Touch Screen (1)

This color LCD screen functions as an additional interface to control Simon *XT* security systems. Optional wireless devices can be added to control HVAC, thermostats and lighting.

Maximum Life Crystal Door/Window Sensors (3)

Featuring two-axis sensing and 10+ year maximum battery life, these wireless sensors are designed to monitor doors, windows, cabinets or virtually anything that opens.

PIR Motion Detector (1)

Featuring advanced signal processing, this detection device identifies the movement of a person within a specific area by sensing the infrared energy and is capable of eliminating the possibility of false alarms due to pets.

Four-Button Keychain Remote (1)

The powerful touchpad acts as an electronic key to arm or disarm security systems. The recessed buttons prevent false alarms.

Simon *XT* Talking Touch Screen Kit + GSM

This kit includes all the products and benefits of the Simon *XT* Talking Touch Screen Kit with the addition of the GSM wireless module that works seamlessly with Alarm.com interactive services and mobile applications.

GSM Reporting

AT&T™ or T-Mobile® cell coverage options allow you to view household activity online, check in on children or the elderly and even keep tabs on vacation properties.

Interactive Services through Alarm.com

Optional Z-Wave® thermostats and lighting control devices with programmable options help promote energy savings and additional security protection at home and remotely. Four-day weather forecast provides weather information quickly and conveniently.

Z-Wave® is a registered US trademark of Zensys A/S.
Complies with FCC and Industry Canada regulations.
