

Mini-GBIC SFP & SFP+ Transceivers

Small Form-factor Pluggable
Transceiver Modules

OVERVIEW

The IFS family of Small Form-factor Pluggable (SFP) Transceiver Modules are designed for high performance integrated duplex data transmission over optical fiber. These SFP transceiver modules are compliant with the industry's SFP Multi-source Agreement (MSA) standard.

The IFS SFP Transceiver Modules offer the ability to enable the SFP ports on any Ethernet equipment that have a built-in SFP Mini-GBIC interface. These modules are hot-swappable without any interruption of the host equipment operation.

These SFP modules are available in 100Base-FX/BX or 1000Base-TP/FX/BX configurations allowing for use of either one fiber or two fiber transmission over single mode or multi-mode optical fiber. The 10 Gigabit SFP+ modules are available for single mode and multi-mode fiber for use in IFS switches that support 10G SFP+ slots for high-bandwidth switch trunking and communication links.

Additionally, certain SFPs are available as wide-temperature versions for use in industrial equipment deployed in harsh environments.
