

IFS[®] Network Switches

Leading transmission solutions for today's demanding IP video security networks

Seamless integration with TruVision® Navigator.

Select IFS® network switches integrate with TruVision Navigator unified security software. With TruVision Navigator, you can:

Discover

Easily discover, add and manage select IFS network switches

Configure

Log in and configure IFS switches within the TruVision Navigator interface

Control

Give switch ports logical names and easily reset PoE

Monitor

Easily monitor port status on multiple switches in one view

Intuitive. Powerful. Integrated.

TruVision Navigator brings together TruVision video, TruPortal™ access control, UltraSync® intrusion and IFS network switches into one integrated system. Ideal for small and mid-size businesses as well as commercial applications, TruVision Navigator provides powerful centralized and remote management capabilities, so administrators can manage every aspect of their TruVision-based surveillance system, easily and effectively.

Intuitive and integrated network switch management for today's demanding IP video applications.

IFS® network switches from Interlogix are designed for high-bandwidth, real-time IP video performance in enterprise small and mid-sized business, commercial, and industrial environments. They offer simple, but powerful, web interface, full-power isolated PoE and built-in diagnostics, and they support multicast to reduce network bandwidth.

Robust performance. Complete flexibility.

Reliable operation

Combining solid engineering practices and quality components, IFS products have a long-standing reputation for precise design that is field proven and time tested. All IFS network products:

- Meet IEEE standards
- Are fully interoperable with other vendors in an enterprise network environment
- Come with pre- and post-sales engineering support from Interlogix
- Undergo stringent quality control
- Come with a three-year warranty

Application flexibility

Interlogix provides IFS transmission products to system integrators, governments and Fortune 500 companies around the world.

The IFS transmission products are also suitable for use in many types of applications including:

- Airports
- Parking lots
- Enterprises
- Higher education
- Retail

Easy Installation

IFS products are designed to make any installation quick and easy by offering broad-range compatibility and eliminating the need for in-field optical adjustments. Our managed network switches include:

- An intuitive, browser-based GUI for user-friendly operation
- Advanced CLI interface preferred by most IT administrators
- Built-in troubleshooting tools for reduced service calls and lower maintenance costs

IFS® network switch lineup.

ES Series

Economy Switches

IFS ES Series network switches are Web smart, Fast Ethernet switches that are designed to deliver a cost-effective network switch solution for smaller, standalone systems.

Key Features

- Fast Ethernet
- 8, 16, 24 ports
- GigE RJ45/SFP trunk ports
- Web-smart L2 management
- High-power PoE provides robust PoE power to meet the demands of IP video
- PoE usage meter enables at-a-glance monitoring of total PoE usage percentage

NS Series

L2/L3 Network Switches

IFS NS Series network switches are Gigabit Ethernet, fully managed switches that are designed to provide fast and efficient connectivity in larger, commercial applications.

Key Features

- Gigabit Ethernet
- 8 and 24 ports
- L2/L3 management
- Robust PoE+ power budgets
- Device health check automatically monitors IP device and remotely cycles PoE to restart device
- Front panel LCD touchscreen, on select switches, enables easy monitoring of PoE power, switch configuration and troubleshooting

PoC Series

Power over Coax Switches

IFS PoC Series network switches are Fast Ethernet, fully managed switches designed for analog to IP video migration applications. This cost-effective solution reduces installation costs and increases ROI by utilizing existing coax to transition from an analog video system to an IP video surveillance system.

Key Features

- Fast Ethernet
- 8, 16, 24 ports
- Data/Power over coax cable
- Robust PoE+ power budgets
- Device health check automatically monitors IP device and remotely cycles PoE to restart device
- Remote power over coax can power up to four devices over existing coax cable

Industrial Series

Hardened Switches

IFS Industrial Series network switches are Gigabit PoE+ managed switches with an industrial hardened design. This design provides for operational recovery in the event of a network or power system failure.

Key Features

- Fast or Gigabit Ethernet
- 4, 8, 16 ports
- DIN-rail or surface mount
- Redundant power
- Device health check automatically monitors IP device and remotely cycles PoE to restart device
- Wide-temperature operation IP67 enclosures work within a -40° to +75°C temperature range

Interlogix provides leading security and life-safety solutions for residential, small- to mid-sized businesses and commercial applications covering intrusion monitoring, video surveillance, network transmission and access control. Offering some of the most-trusted product names in the industry, and backed by ongoing partner services and support, Interlogix helps customers secure and protect what matters most. Interlogix is part of Carrier, a leading global provider of innovative HVAC, refrigeration, fire, security and building automation technologies.
