EMEA: www.utcssecurityproducts.eu

Australia: www.interlogix.com.au

Overview

The TVR 11 is a Digital Video Recorder (DVR) for 4/8/16 analog cameras (including domes and PTZ). Firmware 3.0 introduces new features and defect fixes.

Summary of new features and key enhancements

- Network Connection Alarm configurable on the OSD “Disable Network Connection Alarm” checkbox
- Bit rate recommendations: On both OSD and browser, information is displayed to inform the user of the recommended bit rate for the currently selected resolution and frame rate
- Playback Bandwidth Throttle for remote playback and download
- Added V-stream remote configuration permission

Summary of defects fixed

- Bandwidth Limit: Playback is cut off instead of throttled
- TVR 11 reboots when there is an issue with the network
- Missing "Remote Manual Operation" permission in web
- OSD page crashes when alarm/motion is triggered with some linking methods
- The user can configure S.M.A.R.T. settings via the web when he only has "Remote Parameters Settings" permission
- Changed camera quality default value from High to Medium
- TVR 11 Player: Cannot start playback by clicking on the Play button
- Changed terminology for enable/disable front panel lock
- Improper message pops up when a value entered is less than "0" in "Max. Record/Picture Capacity" field

Contacting Support

For help installing, operating, maintaining, and troubleshooting this product, refer to this document and any other documentation provided. If you still have questions, contact us during business hours (Monday through Friday, excluding holidays).

Note: Please be ready at the equipment before calling.
