

# TruVision Navigator 7.1 Licensing Addendum

P/N 1073271-EN • REV B • ISS 08DEC17

## **Overview**

This document describes TruVision Navigator 7.1 licensing features.

A 30-day trial period for the licensed features is activated upon initial installation or an upgrade of the Navigator software. During the trial period, the number of days remaining in the trial are shown in a Warning dialog that appears after launching Navigator, and in ToolTips. Click **Don't warn me again** to disable the warning notification.

Warning	
Your free 30-day license will expire in 30 days.	
🗹 Don't wam me again	
Close	

After the trial period expires, licensed features icons in the Navigator panel appear with a yellow icon to indicate that the features are disabled. When this occurs, a permanent license must be obtained to activate the licensed features.

To obtain a permanent license, contact your local sales representative or contact customer support at licenses@interlogix.com or call +1 855 286 8889, option 1.

# **Licensed features**

The following Navigator features are licensed:

• Websites (browser support), Access Control, and Logical Views

• Logical Event Filtering (in the Settings window)

Setup Wizard for New Systems and Firmware Updates – Device Manager

When less than seven days are left in the trial period, a dialog box appears after launching Navigator. After the trial period expires, licensed features icons in the Navigator panel appear with a yellow icon to indicate that the features are disabled. After this occurs, a permanent license must be obtained from Interlogix customer support or an authorized Interlogix channel partner.

## Activating a license

To activate the licensed features, a license key must be obtained from Interlogix. The user activating a Navigator license must be logged in as an Administrator.

To activate a license:

1. Click on the Navigator main menu button and select Licensing.

2. The Licensed Features window appears. Click Update License.

	License type: Evaluating
	Days remaining for evaluation: 30
eature	s Enabled
1	Website
2	Access Control
3	Logical View
4	Logical Event Filtering
5	New System Setup Wizard & Firmware Updates
6	Bookmark
	Offline Mode

3. The Update License window appears. Contact Interlogix and obtain a license key. The customer key must be provided to Interlogix to obtain a license key.

Valid license	OK Cancel			

5. When a valid license is entered, the **OK** button is activated. Click **OK** to store the license key. The licensed features appear in the Navigator panel with activated icons.

## License tampering

Changing a computer's date affects licensing:

- Changing to a previous date during the trial period invalidates and locks the licensed features. If this occurs, a permanent license must be obtained to activate the licensed features.
- Changing to a future date during the trial period reduces the number of days available to evaluate the licensed features.
