Package contents

- Camera assembly (cable harness not shown)

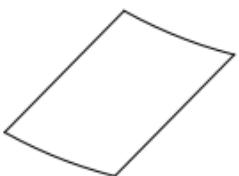

- 3 M4 x 25 mm screws and 3 anchors for wall or ceiling installation

- Camera drill template

- 2 screws M4 x 8 used for installing the camera to the adapter plate

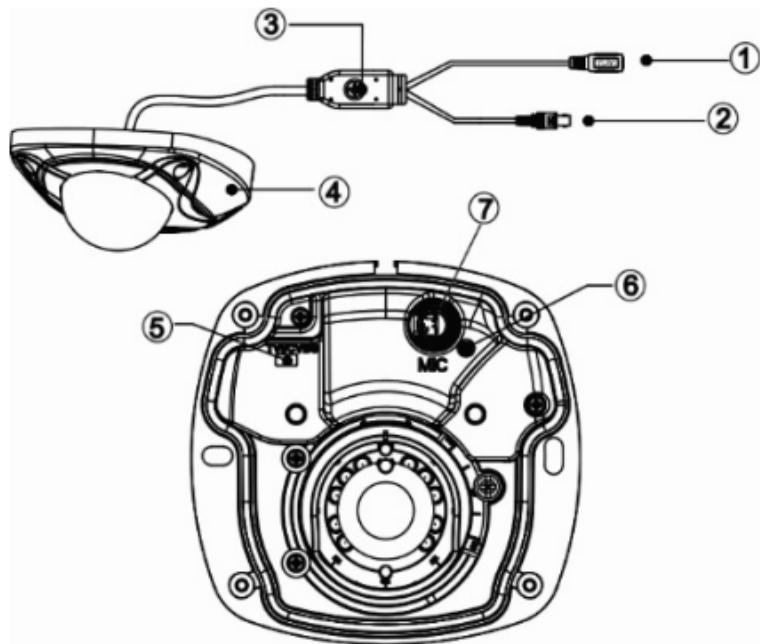

- Torx wrench
- Adapter plate
- Adapter plate drill template
- 12 VDC connector (2 terminal connectors with positive and negative indicators)
- Lens adjustment tool
- Installation guide

- Equipment
disposal sheet

Camera description

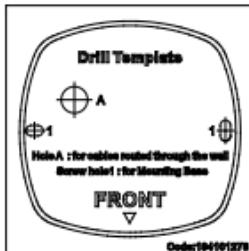

- | | |
|-----------------------------------|------------------------------|
| 1. 12 VDC power cable | 5. TVI / 960H analog switch |
| 2. TVI / 960H analog video output | 6. Power LED |
| 3. OSD menu button | 7. MIC (Audio not supported) |
| 4. Camera housing | |

Note: When using the HD-TVI output, the HD-TVI wedge camera should only be connected to a DVR that supports a TVI signal.

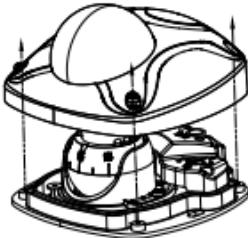

Installation

To install the camera on a surface:

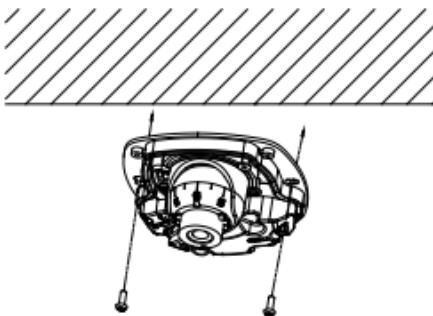

1. Use the camera drill template to mark the mounting holes.

2. Follow all local safety regulations. Drill through the mounting surface. If you need to route the cables from the bottom of the camera, drill a larger hole in the mounting surface for the cable harness.
3. Using the Torx wrench, loosen the four screws to remove the housing cover from the device.

4. Install the mounting base to the surface using two of the M4 x 25 mm screws and anchors. If routing the cable harness through the ceiling, do so prior to mounting the camera.

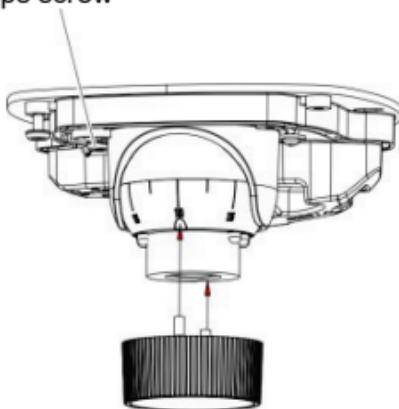

5. Loosen the Philips screw, located near the lens assembly. Align the lens adjustment tool with the two small holes located on the camera assembly.

Rotate (pan) the camera assembly using the lens adjustment tool until the lens is positioned

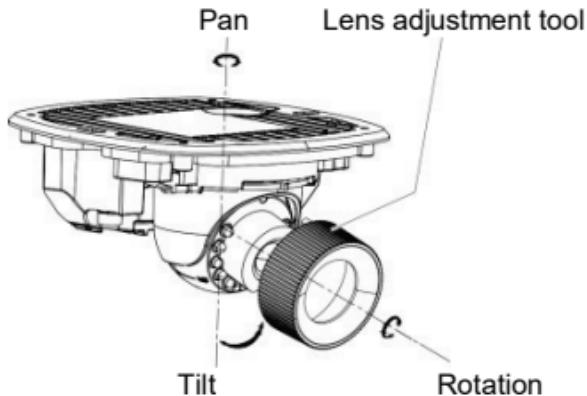

in the correct location. The tool is also used to adjust the tilt angle.

Lens adjustment tool

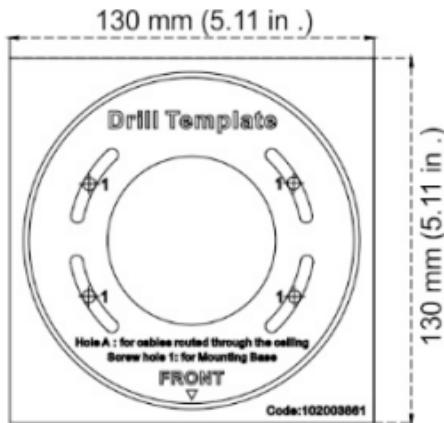

Note: Please do not remove the foam ring attached to the lens. This foam ring is required to reduce the glare of IR illuminators.

6. Tighten the Torx screw and re-install the housing cover to the camera assembly using the Torx wrench.

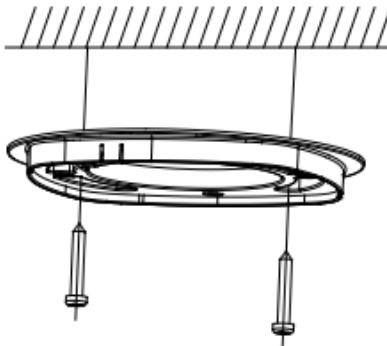

To install the camera using the adapter plate:

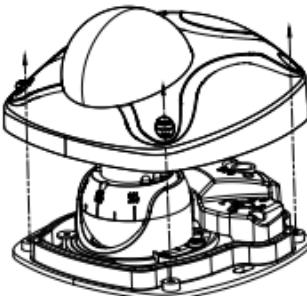

1. Use the adapter plate drill template to mark the holes.

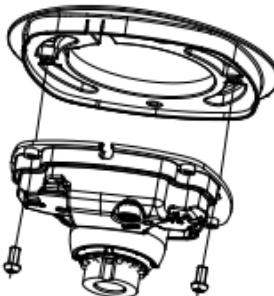

2. Follow all local safety regulations. Drill through the mounting surface. If you need to route the cables from the bottom of the camera, drill a larger hole for the cable harness.
3. Install the adapter plate to the using two of the M4 x 25 mm screws and anchors.

4. Using the Torx wrench, loosen the four screws to remove the housing cover from the device.

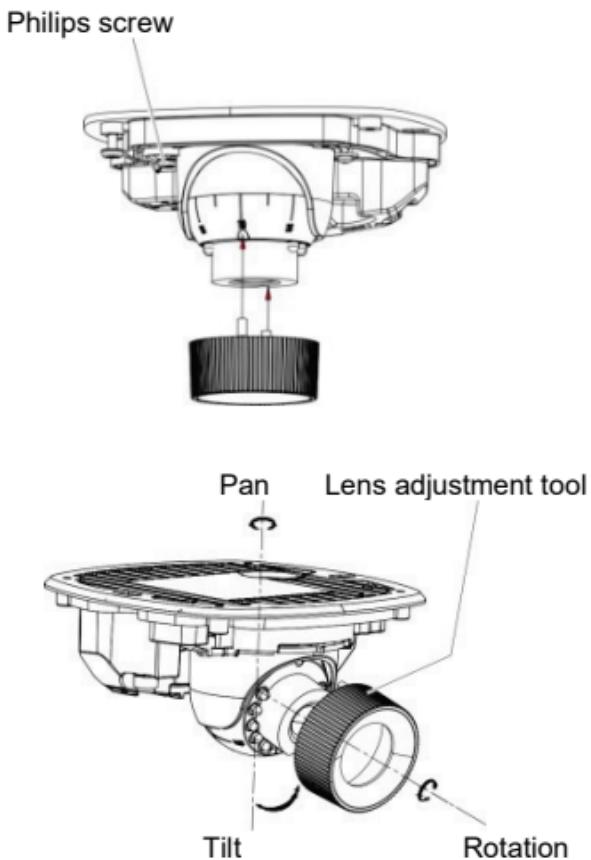

5. Install the camera base to the adapter plate using the two M4 x 8mm screws.

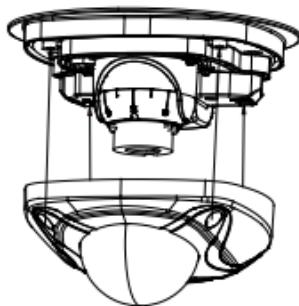

6. Loosen the Philips screw located near the lens assembly. Align the lens adjustment tool with the two small holes located on the camera assembly.

Rotate (pan) the camera assembly using the lens adjustment tool until the lens is positioned in the correct location. The tool is also used to adjust the tilt angle.

Note: Please do not remove the foam ring attached to the lens. This foam ring is required to reduce the glare of IR illuminators.

7. Tighten the Philips screw and re-install the housing cover to the camera assembly using the Torx wrench.

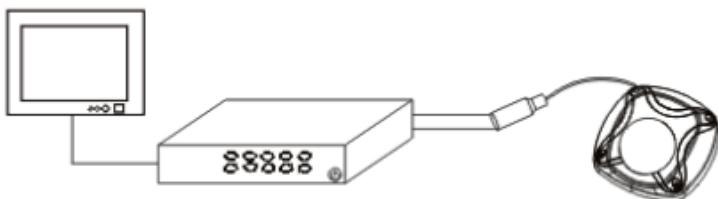

Program

In HD-TVI or Analog mode, use the OSD (On Screen Display) button to program the camera. The button is located on the cable harness. In HD-TVI mode, the OSD menu can also be accessed via the TVI recorder.

Using a TVI output

Once the camera has been installed, you can configure the camera settings on the TVI DVR.

Connect the TVI cable to the DVR, as shown.

Select the PTZ protocol **TruVision Coax** and click the **Menu** button to call up the camera menu.

For more details, refer to the TVI DVR user manual.

Call up the camera OSD (On Screen Display) menu

To set up the camera in HD-TVI mode:

1. In Camera Settings of the DVR, access the PTZ menu and select the *TruVision-Coax* protocol for the TruVision HD-TVI camera from the drop down menu.

2. In live view of the desired camera, click the PTZ Control icon on the live view toolbar to access the PTZ control panel.

3. To call up the camera setup menu:

From the camera OSD of the DVR, select Menu.

— or —

From the DVR, select Iris+.

The camera setup menu appears (see “Menu tree” on page 18 for the menu structure).

4. Select the menu options:

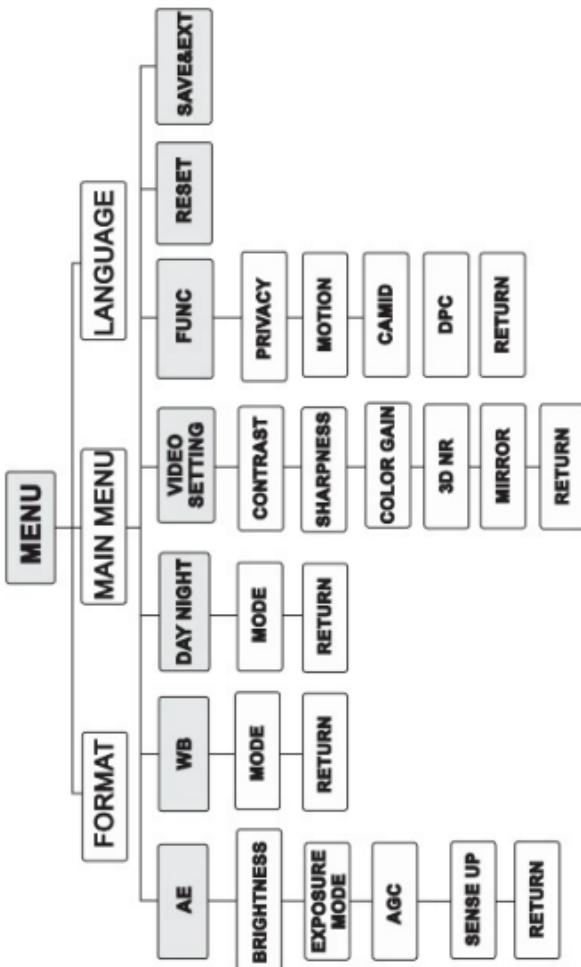

From the TVI recorder (HD-TVI mode): To select an OSD item, click the directional buttons up/down. To adjust the value of a selected item, click the directional buttons left/right.

From the camera (HD-TVI or Analog mode):

The OSD button is located on the cable harness. To select an OSD item, push the **Menu** button up/down. To adjust the value of a selected item, push the **Menu** button left/right.

5. Click **Iris+** to enter the submenu or to confirm the selected item.
 6. When the setup is complete, select **Exit** and click **Iris+** to exit the camera OSD.
- Note:** You cannot exit the camera setup menu using the Menu button on the camera.
