

# TruVision Navigator 8.0 SP2 Licensing Addendum

P/N 1073456-EN • REV C • ISS 08MAY19

#### **Overview**

This document describes TruVision Navigator 8.0 SP2 licensing features.

A 7-day trial period for the licensed features is activated upon initial installation or an upgrade of the Navigator software. During the trial period, the number of days remaining in the trial are shown in a Warning dialog that appears after launching Navigator, and in ToolTips. Select **Don't warn me again** to disable the warning notification.

**Note:** The trial period is 30 days on computers where a previous version of TruVision Navigator was installed.

After the trial period expires, licensed features icons in the Navigator panel appear with a yellow icon to indicate that the features are disabled. When this occurs, a permanent license must be obtained to activate the licensed features.

To obtain a permanent license, contact your local sales representative or contact customer support at licenses@interlogix.com or call +1 855 286 8889, option 1.

# **Licensed features**

The following Navigator features are licensed:

 Websites (browser support), Access Control, Intrusion Detection, Network Switches, and Logical Views

• Decoders (Add Scene and Activate Scene)

Add Scene	
Configure Device	
Reboot Device	
Delete Device	Activate Scene
Rename Device	Rename Scene Title
Properties	Delete Scene

• Logical Event Filtering (in the Settings window)

• Server offline mode

When less than seven days are left in the trial period, a dialog box appears after launching Navigator. After the trial period expires, licensed features icons in the Navigator panel appear with a yellow icon to indicate that the features are disabled. After this occurs, a permanent license must be obtained from Interlogix customer support or an authorized Interlogix channel partner.

## Activating a license

To activate the licensed features, a license key must be obtained from Interlogix. The user activating a Navigator license must be logged in as an Administrator.

To activate a license:

1. Click on the Navigator main menu button and select Licensing.

2. The Licensed Features window appears. Click Update License.

Licensed F	eatures	×	
	License type: Evaluating		
1	Days remaining for evaluation: 7

Valid license	OK Cancel	]

5. When a valid license is entered, the **OK** button is activated. Click **OK** to store the license key. The licensed features appear in the Navigator panel with activated icons.

## License tampering

Changing a computer's date affects licensing:

- Changing to a previous date during the trial period invalidates and locks the licensed features. If this occurs, a permanent license must be obtained to activate the licensed features.
- Changing to a future date during the trial period reduces the number of days available to evaluate the licensed features.
