

TruVision TVR 15HD Firmware 2.0 Release Notes

P/N 1073484-EN • REV A • ISS 23MAY18

Introduction

This is the TruVision TVR 15HD Firmware 2.0 Release Notes document with additional information not covered in the user manual. For the latest information on the TruVision DVR 15HD (TVR 15HD), please visit:

Americas: www.interlogix.com/videoupgrades

EMEA: www.firesecurityproducts.com

Australia: www.interlogix.com.au

Overview

The TVR 15HD is a full hybrid recorder that can work with standard analog, HD-TVI and IP cameras. The TVR 15HD also features the signature built-in TruVision intrusion integration functionality. Firmware 2.0 contains enhancements and a bug fix.

Summary of key enhancements

- A name can be entered for ONVIF cameras and that name will appear in the tree structure of TruVision Navigator and the recorder's webpage.
- When playback is done via TruVision Navigator and video is searched for a time/date for which no video exists, the playback will start for the next available video clip.
- Support for FTP upload for snapshots (for motion detection) for analog/HD-TVI cameras
- Security enhancements
- Intrusion integration:
 - Support for search for events via OSD

- Reporting of events to TruVision Navigator 7.1 and SDK
- More actions for 'alarm linking': full screen monitoring and upload snapshots to FTP (only for HD-TVI/analog cameras)

Bug fix

- Camera import: correct resolutions/frame rates can now be imported

Limitation

- FTP snapshot upload does not work for IP cameras

Contacting support

For help installing, operating, maintaining, and troubleshooting this product, refer to this document and any other documentation provided. If you still have questions, contact us during business hours (Monday through Friday, excluding holidays).

Note: Please be ready at the equipment before calling.
