# Introduction

This pocket guide provides basic information on installing the TruVision IP dome and wedge dome open-standard cameras.

For detailed information on installing and using the cameras, please refer to the user manual.

## Package contents

The camera is shipped with the following items:

- Camera
- Hex wrench
- Mounting plate (excluding wedge dome cameras)
- Video cable for testing (excluding wedge dome cameras)
- Multilingual quick start guide
- CD with user manual in several languages

## Installation environment

Refer to the user manual for detailed information, but observe these important requirements:

- Place the camera in a secure location.
- Ensure that the camera is in a well-ventilated area.
- Do not expose the camera to rain or moisture.

## Camera dimensions

See Figure **A** (Dome and IR dome cameras) and Figure **B** (Wedge dome cameras).

## Setting up the camera

**Note:** If the light source where the camera is installed experiences rapid, wide variations in lighting, the camera may not operate as intended.

For detailed instructions, please refer to the user manual.

### To quickly put the camera into operation:

1. Prepare the mounting surface.
2. Connect the required cables to the camera.
3. Mount the camera to the ceiling using the appropriate fasteners.
4. Set up the camera's network and streaming parameters so that the camera can be controlled over the network.
5. Program the camera to suit its location.

## Connecting the devices

### Dome cameras:

See Figure C (Connections on the base of the dome and IR dome cameras).

1. Ground. Connect to ground.
2. Ethernet RJ45 PoE port. Connect to network devices.
3. Audio output. Connect to an audio output. Line level, 600 Ω.
4. Initial set. Press to hard reboot camera.
5. Audio input. Connect to an audio input. 2.0 to 2.4 Vp-p, 1 kΩ.
6. RS-485 D+, D-. Connect to an RS-485 device such as a PTZ dome camera.
7. Alarm outputs. Connect 1A/1B and 2A/2B to alarm output devices.
8. Alarm inputs. Connect IN1/GND and IN2/GND to alarm input devices.
9. Power supply. Connect +12 VDC power supply.

### **Wedge dome cameras:**

See Figure **D** (Wedge dome camera connections).

1. Power input connector. Connect +12 VDC power supply. Optional.
2. Ethernet RJ45 PoE connector. Connect to the network devices.
3. Lens.
4. Power LED.
5. Lens positioning screws.
6. Network status LEDs.
7. Reset switch. Click to reset all parameters to factory default.

### **Accessing the SDHC card**

Insert an SDHC card up to 32GB for local storage in the dome cameras (see Figure **C**, item **⑩**). The card is not supplied with the camera.

Video and log files stored on the SDHC card can only be accessed via the Web browser. You cannot access the card using TruVision Navigator or a recording device.

**Note:** There is no SDHC card slot in the wedge dome cameras.

### **Accessing the camera over the internet**

Use the camera Web browser to access and configure the camera over the internet. Only one camera is accessible from a single Web browser window.

#### **To access the camera online:**

1. In the Web browser enter the camera's IP address (default is 192.168.1.70). The Login dialog box appears.

**Note:** Ensure that the Active X controls are enabled.

2. Enter your user name and password.

User name: *admin*

Password: *1234*

3. Click **OK**. The Web browser window appears in live mode. See Figure **E**.

## Overview of the camera Web browser

See Figure **E** (Camera Web browser interface).

Item	Name	Description
1.	PTZ controls	For future use.
2.	Live view	Click to view live video.
3.	Playback	Click to play back video.
4.	Log	Click to search for event logs. There are four main information types: All, Alarm, Notification and Operation
5.	Configuration	Click to display the configuration screen for setting up the camera.
6.	Viewer	Click to view live or play back video.
7.	Current user	Displays current user logged on.
8.	Exit	Click to log out from the system.
9.	Full screen	Click to view as full screen.
10.	Start/stop live view	Click to start/stop live view.
11.	Capture	Click to take a snapshot of the video. The snapshot will be saved to the default folder in jpeg format.
12.	Start/stop recording	Click to record live video.
13.	Video image settings	Click to adjust video image settings such as brightness, contrast, saturation, hue and exposure time.
14.	e-PTZ	Click to enable/disable e-PTZ. When enabled, scroll on the mouse wheel to zoom in and out of an image on-screen.

Item	Name	Description
15.	Audio setting	Click to start/stop bi-directional audio. <b>Note:</b> You need to have a microphone attached to your PC to be able to send out audio.
16.	Audio on/off	Click to turn the audio function on or off.

## Network and streaming configuration

In the camera Web browser screen click the Configuration button on the toolbar to display the configuration screen. See Figure F (Configuration screen).

Refer to the User Manual for detailed information on configuring the cameras. See Table 1 on page 10 for an overview of the configuration parameters.

**Note:** The On-screen display (OSD) menus are in English only.

**Table 1: Overview of the configuration parameters**

Configuration folders	Description
Local configuration	Defines the network type, display mode and local storage paths.
Basic information	Defines the camera name and RS-485 bus ID. This screen also displays the MAC address, device type, device SN and the current firmware version.
Channel parameters	Defines the OSD properties of camera information, recording parameters and schedules, motion detection parameters, image quality, alarm responses, and overlay text.
Network parameters	Defines the network parameters required to access the camera over the internet.

Configuration folders	Description
Serial settings	Defines the RS-485 and RS-232 communication settings.
Alarm parameters	Defines how the camera handles alarms such as input type, notification of alarms, and response schedules and duration.
Deployment time	Defines the schedules during which events are registered.
User management	Defines who can use the camera, their passwords and access privileges.
HDD management	Defines how to format the SDHC card used in the camera.
Remote upgrade	Defines how to upgrade the camera's firmware.
Default	Restores default settings.
Reboot device	Reboots the camera.

## Specifications

### Dome and IR dome cameras:

#### **Electrical**

Power consumption	4.5 W max.	TVD-N210V-2-N(-P), TVD-M2210V-2-N(-P), TVD-M2215V-2-N(-P), TVD-M3210V-2-N(-P), TVD-M3215V-2-N(-P)
	5 W max.	TVD-M5225V-4-N(-P)
	5.5 W max.	TVD-N245V-2-N(-P)
	7.5 W max.	TVD-M1210V-2-N(-P), TVD-M1225V-2-N(-P),

#### **Miscellaneous**

Dimensions (D × H)	140 × 120 mm (5.5 × 4.7 in.)
--------------------	------------------------------

<b>Weight</b>	1.3 kg (2.8 lbs)
<b>Environmental rating</b>	Indoor vandal-resistant

**Wedge dome cameras:**

**Electrical**

<b>Power consumption</b>	4 W max.
--------------------------	----------

**Miscellaneous**

<b>Dimensions (L × W × H)</b>	100 × 98 × 47 mm (3.94 ×3.84 ×1.83 in.)
<b>Weight</b>	0.5 kg (1.1 lbs.)
<b>Environmental rating</b>	IP66 vandal-resistant

**All cameras:**

**Electrical**

<b>Voltage input</b>	12 VDC, PoE (IEEE 802.3af)
<b>I/O connection</b>	DC jack flying lead, RJ45 flying lead

**Network**

<b>Protocols</b>	TCP/IP, HTTP, DHCP, DNS, DDNS, RTP/RTCP, PPPoE, SMTP, NTP
<b>Ethernet/IP</b>	CoS 802.1 p/Q, QoS, IPv4
<b>PoE IEEE</b>	802.3af

**Miscellaneous**

<b>Operating temperature</b>	-10°C to +60°C (14 to 140°F)
<b>Storage temperature</b>	-20 to +70 °C (-4 to +158 °F)

**PC requirements**

<b>Intel-based PC</b>	1 GHz or faster
<b>Memory</b>	1 GB RAM
<b>Operating system</b>	Windows® XP, Vista or Windows 7
<b>CGI</b>	Direct X 9.0 or later
<b>Browser</b>	Microsoft Internet Explorer 6.0 or later
