OVERVIEW

The TruVision® NVR 21 (TVN 21) is a high-performance network video recorder designed to support video streams from IP video cameras. With a total of 40/80 Mbps of total bandwidth available, the TVN 21 can support up to 16 cameras at HD resolution in real-time (30fps) and many other configurations.* Flexible bandwidth allocation per channel allows users to maximize recording performance. In addition to browser, software and mobile device management tools, the NVR 21's familiar front panel controls allow for easy operation.

IP camera support includes resolutions ranging from standard VGA to 5.0 megapixel, including Interlogix and third-party IP camera manufacturers.** The NVR 21 also supports TruVision encoders for integrating existing analog cameras. Up to four internal hard disk drives may be configured for a total internal hard drive capacity of 2TB-8TB, making the TVN 21 ideal for extended storage or megapixel camera applications.

Recording options include continuous, motion, and alarm or combined scheduled recording modes. Motion recording utilizes an IP camera's built-in motion detection events, and alarms can be triggered from any of the 16 on-board alarm inputs or from alarm inputs that reside on the IP camera.

Software connectivity allows remote access to the recorder's full capabilities via Web browser or TruVision Navigator. TruVision Mobile also allows for remote device access. Configuration is quick and easy through startup wizards, IP device auto-discovery tools and ezDDNS service.

**Support from third-party IP cameras may vary.*

STANDARD FEATURES

Camera Support
- Up to 8/16 HD cameras (OnVIF/PSIA) in real time (30fps)
- TruVision and UltraView IP cameras from VGA through 5.0 megapixel (indoor and outdoor)
- H.264 Axis, Arecont, ACTi, Panasonic, Samsung, Sony and Vivotek (VGA/Megapixel)
- TruVision 4-, 8- and 16-channel encoders
- PTZ and dome camera control via mouse, front panel joystick and IR remote control

Recording Capabilities
- Continuous, motion or scheduled recording modes
- Event recording based upon native IP camera activity detection or via unit alarm input
- Video is stored in the native IP camera format
- Audio recording with capable IP cameras
- Redundant camera recording or independent storage groups for different durations
- Reverse playback
- Digital zoom on live and recorded video
- Text insertion via ProBridge for ATM/POS
- Watermarking for legal video authentication

Hardware
- Compact rack mountable – 1.5 RU
- Up to 8TB of plug-and-play internal, front accessible hard disk storage
- Support for external hard drive (eSATA)
- 16 on-board alarm inputs and 4 configurable alarm outputs
- Local USB archiving
- Composite, VGA and HDMI output for high-quality local viewing
