NetworX NX540E Addendum

Checksum FDCF dated 26-June-2002

The NX540E interface module is compatible with the NX8E control panel. The following <u>limitations</u> apply:

1. Zones 48 – 192 do NOT have custom zone descriptions. The interface module will simply state the zone number, i.e. "Zone 49" to "Zone 192".

2. PINs for Users 100 – 240 cannot be programmed through the NX540E interface.
