

# Simon® 5” TouchScreen

## OVERVIEW

The Simon 5” TouchScreen is a color LCD screen featuring a user-friendly interface that complements Simon security systems for safety and peace of mind. The easy to use touch screen provides system owners with at-a-glance home status information, allowing easy and convenient control of Simon systems. This touch screen is the ideal solution for providing additional points of control throughout the home. Up to four touch screens can be installed in one home for maximum convenience.

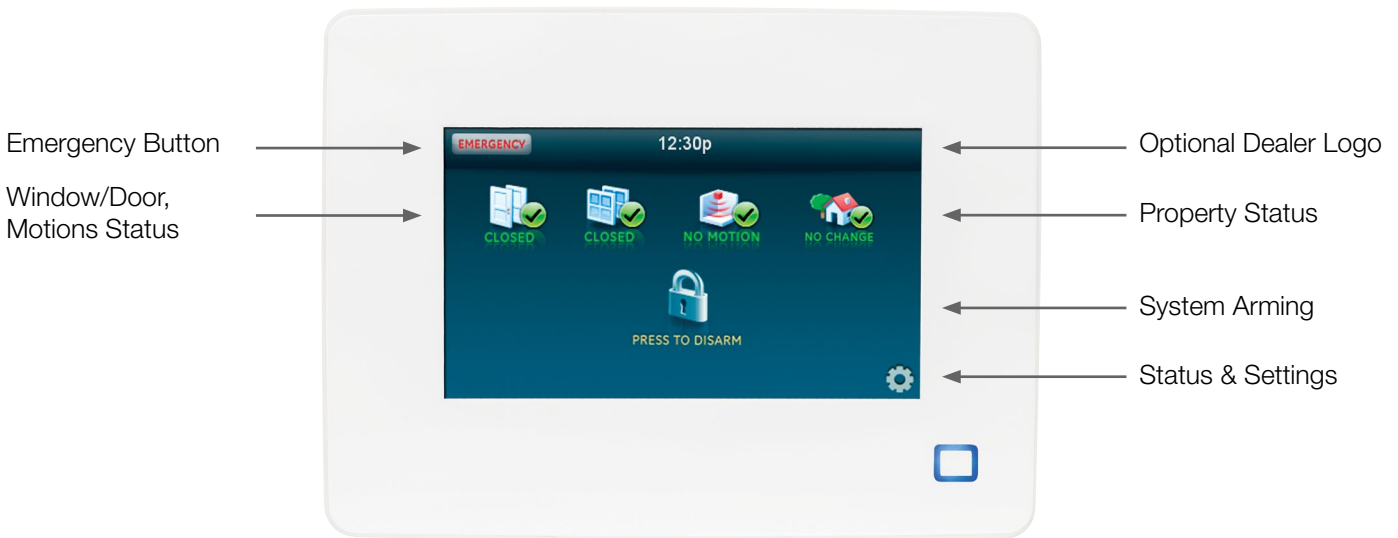

Simon 5” TouchScreens quickly and seamlessly connect to the Simon panel using the Interlogix wireless 319.5MHz protocol. Each touch screen comes with both a wall plate and table top stand to accommodate wall mounting or table top installations. They also have a built-in rechargeable battery that provides backup power in case of power outages. An integrated speaker provides voice, chime and siren notifications, alerting system owners of trouble and alarm conditions.

In addition to controlling the alarm features of the Simon system, when installed with a Simon panel that is equipped with Alarm.com®, Simon 5” TouchScreens enable control over other functions including Z-Wave® wireless lighting control devices, thermostats for home HVAC systems, and door locks. Alarm.com also enables additional lifestyle-enhancing information such as the current outdoor temperature and a four-day weather forecast right on the screen.

## STANDARD FEATURES
