

Protecting your home and family with wireless security from GE.

DesignLine wireless products

Less is more

DesignLine wireless products from GE Security represent the latest technology for reliable and convenient home security. Their unique design offers the smallest, most unobtrusive wireless security sensors in the industry. And because DesignLine sensors are wireless, they install in less time, at a lower cost and with more options for sensor locations.

DesignLine Flat Wall Touchpad

- Easily mounts to wall for convenience
- Sleek modern design fits in any room, flexible placement increases safety
- Arms/disarms systems wirelessly, activates police or auxiliary panic alarm

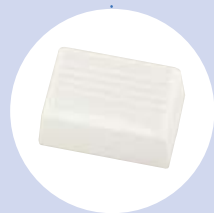

DesignLine Slim Door/Window Sensor

- Advanced circuit technology supplies robust function
- Range function up to 500 ft.
- Runs on lithium battery for 5 to 8 years

DesignLine Tri-Zone Sensor

- Tri-zone sensing protects three zones in close proximity, reducing installation time
- Monitors garage doors and multiple windows (such as a bay window)
- "Tilt" sensing capability detects motion without having to run wires to secure moveable items such as electronics and home theater equipment

DesignLine Garage Door Sensor

- Monitors garage opening to bolster home security
- False alarm prevention for shaking and windy conditions
- Mounts directly on inside of garage door; no wiring required

DesignLine Recessed Door/Window Sensor

- Hidden in door frame, ideal wherever a discreet sensor is desired
- Compact design ensures effortless installation
- Easy install with one drill bit

DesignLine Keyfobs

- Compact size fits easily in a purse, pocket or on a keychain
- Easy touch control acts as electronic key
- 2-button: Arms and disarms systems wirelessly
- 4-button: Arms and disarms systems wirelessly; activates police or auxiliary panic alarm; turns lights on and off
- 5-button with flashlight LED: Arms and disarms systems wirelessly; activates police or auxiliary panic alarm; turns lights on and off; bright-white LED flashlight

Don't make it hard

There's a reason they call it hard wiring. It means having to drill multiple holes and run lines, and there are limits to where wired sensors can be placed. DesignLine wireless sensors are easy to install and, because they're wireless, they can be located almost anywhere.

Convenient placement of components also extends to the flat wall touchpad, which quickly mounts to any wall. The touchpad's comprehensive functionality allows for ease of use through remote connectivity: arm/disarm; activate police alarm; auxiliary panic alarm; and turn lights on and off.

The flat wall touchpad brings the control of the Simon XT™ main panel to any room in the house. With it, you can easily arm/disarm the system or even turn lights on or off.

Performance

METICULOUSLY ENGINEERED FOR YEARS OF ROBUST AND TROUBLE-FREE OPERATION

FEATURING ADVANCED CIRCUIT TECHNOLOGY WITH EXTREMELY EFFICIENT AND RELIABLE SENSORS

HIGH-CAPACITY LITHIUM BATTERY MEANS FEWER BATTERY CHANGES
