TruVision Navigator 8.0 SP2 Release Notes

P/N 1073457-EN • REV C • ISS 03JUL19

Introduction

These are the TruVision Navigator 8.0 SP2 Release Notes with additional information not covered in the user manual. For the latest information on TruVision Navigator 8.0 SP2:

Americas: www.interlogix.com/library

EMEA: www.firesecurityproducts.com

Australia: www.interlogix.com.au

Overview

This document covers the following:

- Summary of new features and key enhancements
- Summary of bugs fixed
- Summary of limitations

Summary of new features and key enhancements

Settings

- In the **Server** tab, support for changing the default sender name for SMTP setup emails was added.
- In the **Server** tab, support for adding and removing LDAP servers was added.

- In the **Groups and Users** tab, support for adding and removing LDAP server users was added. Manage Decoders and Operate Decoders permissions were added.

- In the **Notifications** tab, support for a **Video Export Failure** notification (check box) was added.

Device Manager

- Under the **Discovered Devices** tab, some TruVision recorder models have an additional two characters at the end of the model number (e.g., TVR4616) that indicate channel count.

Navigator main menu

- The Recurring Tasks window was added. It shows both completed and scheduled/active video exports created according to a recurring schedule.

Navigator panel

- A Decoders node was added for TruVision decoders. The user can add, activate, and configure scenes for a decoder.

- The Export Video window launched from the recorder context menu adds configuration features for creating a recurring schedule for video export.

- Support for the TVR46 recorder was added. Thumbnails of recorded video in the Disk Analysis window launched from the recorder context menu for are available for TVR46 only.

Viewer panel

- Thumbnail scrubbing capability was added for TVR46.

Summary of bugs fixed

- Fixed an issue where private custom layouts and views could be displayed or edited by an unauthorized user in TruNav 8.0.2.38.

- Fixed an issue where the Polish version of TruNav Player was not translated.

- Fixed an issue where the TruNav Player Windows region formats a language that is different from English.

- Fixed an issue where the password complexity error was discarded when activating a recorder after restoring the settings (reset of all parameters except network settings).

- Device Manager\Storage Calculator: Changed the default setting on the TVN-Calculator quality to **Medium** instead of **Lowest**.

- Fixed an issue where standalone Device Manager could not export to Microsoft Excel.

- Fixed an issue that was making TruNav take one minute to log in.

- Cybersecurity bugs were fixed.

Summary of limitations

Decoder integration (TVE-DEC12)

- Decoder preview is not available when a V-stream is added to a scene.

- A decoder is not supported in logical views and maps.

- Add or Delete Scene doesn't update from a server or client machine until the user obtains the decoder's configuration.

- Cannot use '&' symbol when creating new scenes or renaming existing scenes.

Server

- "The server is currently offline" message appears when the server installation is upgraded from 8.0 SP1 to 8.0 SP2.

- A certificate error appears when accessing the client URL.

- An error message does not appear when a server machine is upgraded and a client machine retains an older version of TruNav.

Installer

- No warning message appears when upgrading to 8.0 SP2 from a previous version of TruNav.

Recurring video export

- Recurring tasks are not cleared in a server PC when the exporting device is deleted from the client PC.

- A 0 KB file is created when recurring video is exported with a past date and time.

Localization

- Arabic language setting: the month scroll bar option is not available in the TruNav Player.

- Storage calculator: in the multi-language setting, results when attempting to export and print are not localized.

- Danish language: the attributes titles under the recording group box have overlapping text.
- Device report attributes are missing in the following languages: Italian, Dutch, Slovak, Turkish, and Portuguese.
