OVERVIEW

TruVision® IP Megapixel Bullet IR Cameras by Interlogix bring high-definition images to the mass video surveillance market. With 3MPx or 8MPx (4K) resolution options, these cameras provide flexibility for a wide variety of applications.

The IP Megapixel Bullet IR Cameras adhere to ONVIF® Profile G and S open communications standards as well as CGI command set support for simple integration into standard IP systems. By utilizing an integrated browser and micro SD memory card storage capability, these cameras simplify remote, live monitoring/playback of edge-recorded audio and video. Memory card recording also helps protect data in the event of network disruptions.

Cross line, intrusion, object, unattended baggage, and face detection features provide additional flexiblity when monitoring key areas of a facility. These features allow you to be alerted when key exceptions are triggered, reducing the amount of time and effort required when responding to alarms.

STANDARD FEATURES
