Manufacturer	United Technologies Corporation 2955 Red Hill Avenue, Costa Mesa, CA 92626-5923, USA Authorized EU manufacturing representative: UTC Fire & Security B.V. Kelvinstraat 7, 6003 DH Weert, The Netherlands		
FCC compliance	<b>Class A</b> : This equipment has been tested and found to comply with the limits for a Class A digital device, pursuant to part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference when the equipment is operated in a commercial environment. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instruction manual, may cause harmful interference to radio communications. Operation of this equipment in a residential area is likely to cause harmful interference in which case the user will be required to correct the interference at his own expense.		
Canada	This Class A digital apparatus complies with Canadian ICES-003. Cet appareil mumérique de la classe A est conforme à la norme NMB-003 du Canada.		
ACMA compliance	<b>Notice!</b> This is a Class A product. In a domestic environment this product may cause radio interference in which case the user may be required to take adequate measures.		
Certification			
EU directives	2004/108/EC (EMC directive): Hereby, UTC Building and Industrial		

**2004/108/EC (EMC directive)**: Hereby, UTC Building and Industrial Systems declares that this device is in compliance or with the essential requirements and other relevant provisions of Directive 2004/108/EC.

**2002/96/EC (WEEE directive)**: Products marked with this symbol cannot be disposed of as unsorted municipal waste in the European Union. For proper recycling, return this product to your local supplier upon the purchase of equivalent new equipment, or dispose of it at designated collection points. Index 71

## Introduction

## **Features**

#### Hardware

- 7" TFT touch screen at 800×480 resolution
- 4-axis joystick
- Shortcut keys for PTZ control, setting and calling of preset, preset tour, and shadow tour
- Shortcut keys for playback operation
- Shortcut keys for input groups and output groups
- Shortcut keys for wiper and light control operation

#### Software

- Admin, manager, operator, and custom user management
- Supports upgrade by USB flash drive
- Auto searches connected devices in the same network area
- Imports and exports keypad configuration parameters
- Macro command operation
- Storage of recorded files and snapshots to USB flash drive or FTP server
- Plays back recorded files from the USB flash drive
- Plays back remotely recorded files
- Bidirectional audio
- Supports configuration by web server

#### **Decoding capability**

- Provides 1-ch video decoding
- Supports standard MPEG4 and H.264 encoding formats
- Decodes at up to 720P real-time resolution

#### Display decoded video on the monitor

- Displays a decoded camera on the selected window
- Displays a decoded camera group on the selected window
- Sequences a display of a decoded camera group on a monitor
- Sequences a display of a decoded camera group on a monitor group

## Package contents

When you receive the product, check the package and contents for damage and verify that all items are included. If any items are damaged or missing, please contact your local supplier.

Items shipped with the product include:

- TVK-800 keypad
- Power supply unit (PSU)
- Power supply cords (UK and Europe)
- CD-ROM
- User manual

### Installation environment

When installing your keypad, consider these factors:

**Ventilation:** Do not block any ventilation openings. Install in accordance with the manufacturer's instructions. Ensure that the location planned for the installation of the unit is well ventilated and dust-free.

**Temperature:** Consider the device's operating temperature (-10 to +55 °C, 14 to 131 °F) and noncondensing humidity specifications (10 to 90%) before choosing an installation location. Do not install the device on top of other hot equipment.

**Moisture:** Do not use the unit near water. To reduce the risk of fire or electric shock, do not expose this unit to rain or moisture.

**Electrical**: Ensure that the device is connected to a power supply that corresponds with the characteristics listed in the technical specifications.

**Working surface**: Place the device on a horizontal solid surface. Avoid exposure to severe vibrations.

**Caution:** Do not attempt to dismantle this product. Any attempt to dismantle or remove the covers from this product will invalidate the warranty and may also result in serious injury.

## **Description**

This chapter describes how to connect the keypad as well the functions of the different keys on the keypad.

## **Connections**

#### Figure 1: Back view of the keypad

5. Reserved

11. Power on/off

## **Keypad description**

#### Figure 2: Keypad top view

- Playback control See "Playback control dial and keys" on page 7 for further information.
- Function keys Each key has a special function. See "Function keys" below for further information.
- Numeric keys Input numbers as well as ESC and ENTER.
- 4. Lens control keys Zoom in or out, focus near or far, open or close iris.
- 4-axis joystick. Control pan, tilt and zoom as well as capture snapshots. See "Joystick operation" on page 8 for further information.
- 6. Turn light and wiper on or off.
- 7. Touch-sensitive LCD display
- LED indicators: POWER: Lit when keypad is powered up. LINK: Lit when the keypad is connected to the network. Tx/Rx: Flickers when the keypad is transmitting/receiving data. COM: Reserved. ALARM: Reserved.

## **Function keys**

There are 20 function keys. They allow you to quickly select regularly used functions such as to call up presets or to select a monitor.

See Figure 2 above for the location of the function keys on the keypad.

The keys are lit blue when inactive and red when active.

#### Figure 3: Description of the function keys

#### Locking the keypad

When in live view mode, press the LOCK key to lock the keypad and mouse. Once locked, none of the keys (except LOCK), the joystick, the mouse, or the touch screen can be used.

To lock the keypad in live view, press and hold the LOCK key, or press the SHIFT + LOCK keys. When the keypad is locked, the LOCK key is lit red.

To unlock the keypad, press and hold the LOCK key, or press the SHIFT + LOCK keys. The LOCK key turns blue.

The keypad automatically locks after a predetermined period of inactivity. The time (in minutes) can be set in the Keypad > Hardware Settings menu.

Note: The keys are also locked when the screen is automatically locked.

## Playback control dial and keys

See Figure 2 on page 6 for the location of playback control on the keypad.

#### Figure 4: Description of the playback control dial and keys

Not used.	<ul><li>Play the last five minutes in decoder playback mode.</li></ul>
	Play/pause.
Stop play back.	Play back the previous file (not available in USB playback mode).
Record.	Play back the next file (not available in USB playback mode).

## Select options on the LCD display

There are four ways to select and enter items on the LDC display:

- **Touch pen**: Use the touch pen (see Figure 1 on page 5) to select options on screen. Replace the touch pen in its holder when finished using it.
- Finger: Use your finger to select options on screen.
- **Joystick**: Rotate the joystick to position the on-screen cursor in the desired location. Press the center key on the joystick to select.
- **Mouse**: Use a mouse. Plug the mouse into the USB socket on the back of the keypad.

## **Joystick operation**

Move the joystick in one of eight directions to control pan/tilt. Rotate the knob for zoom control.

Press the center key on the joystick for the Enter function and to capture snapshots. Save the snapshots to a USB flash drive or to a FTP site.

## Using the key commands

#### Key operation

Key	Description	Example	
MON	<i>Num+MON</i> : Select the video output to be controlled by the decoder, NVR, or DVR.	Press the 2+ <i>MON</i> keys to select monitor 2.	
	<b>Note:</b> When Num=0, the system enters local live view mode.		

#### Table 1: Operating a multiple video display

Key	Description	Example
MULT	<i>Num+MULT</i> : Select the multiview display format for the selected output channel.	Press the 2+MON+2+MULT keys to configure a two-division display for monitor 2.
WIN	<i>Num+MON+Num+WIN+Num+CAM-G</i> : Output and display the video signal from the camera group on the selected video tile of the monitor in cycle.	Press the 2+MON+3+WIN keys to select video tile 3 of monitor 2.
CAM	<i>Num+CAM</i> : Select the video input.	Press the 2+MON+3+WIN+5+CAM keys to display video input 5 on video tile 3 of monitor 2.
MON-G	<i>Num+MON-G:</i> Select the monitor group.	Press the 1+MON-G keys to select monitor group 1.
CAM-G	<i>Num+CAM-G:</i> Select the camera group.	Press the 1+MON+1+CAM-G keys to select camera group 1 to be displayed on monitor 1.
SET	SET+Num+TOUR/ GROUP/ PATROL/ PATTERN/ PRESET: Set the tour, group, preset tour, shadow tour, or preset.	Press the SET+1+PATTERN keys to set shadow tour 1.
TOUR	<i>SET+Num+TOUR:</i> Set the tour. <i>Num+TOUR:</i> Call the defined tour.	Press the <i>SET</i> +1+TOUR keys to set tour 1. Press the 1+TOUR keys to call the pre- defined tour 1.
GROUP	<i>SET+Num+GROUP:</i> Set the group. <i>Num+GROUP: C</i> all the defined group.	Press the <i>SET</i> +1+ <i>GROUP</i> keys to set group 1. Press the 1+ <i>GROUP</i> keys to call the defined group 1.

#### **PTZ control keys**

#### Table 2: PTZ control keys

Кеу	Description	Example
PRESET	<i>Num+PRESET</i> : Move the PTZ camera to the desired position, and then press the <i>Num+PRESET</i> keys to set a preset.	Press the 1+PRESET keys to set preset 1.
CALL	<i>Num+CALL</i> : Call the predefined preset.	Press the 1+CALL keys to call preset 1.
PATROL	SET+Num+PATROL: Set a preset tour.	Press the SET+1+PATROL keys to set preset tour 1.
	<i>Num+PATROL:</i> Call a predefined preset tour.	Press the 1+PATROL keys to call preset to ur 1.
PATTERN	<i>Num+PATTERN</i> : Call a predefined shadow tour.	Press the SET+1+PATTERN keys to set shadow tour 1.
		Press the 1+PATTERN keys to call shadow tour 1.

#### Other keys

Key	Description	Example	
MAC	<i>Num+MAC</i> : Call the MAC command.	Press the 1+MAC keys to call MAC command 1.	
SHIFT	SHIFT+LOCK: Lock/unlock the system.	Press the SHIFT+LOCK keys to lock/unlock the system.	
LOCK	Lock/unlock the system.	Press and hold the <i>LOCK</i> key, or press the <i>SHIFT</i> + <i>LOCK</i> key, to lock/unlock the system.	
PREV	Select the previous camera for live view on the keypad or a multiview display.		
NEXT	Select the next camera for live view on the keypad or a multiview display.		
AUX1	Press the AUX1 key to set its defined function (bidirectional audio or snapshot).		
AUX2	Press the AUX2 key to set its defined function (bidirectional audio or snapshot).		

#### Table 3: Functions of the other keys

#### Entering characters on screen

A soft keyboard will appear on screen when you need to enter characters in a screen option. Click a key to input that character.

#### Figure 5: Soft keyboard

a

abc 123

Click to enter letters or numbers.

Click to switch between upper and lower case.

## Overview of the user groups

By default the keypad comes with four user groups: Administrator, Manager, Operator, and Customized User.

User	Description		
Admin	The administrator has full access to all menu settings.		
	Configure basic parameters of the keypad		
	Add, modify, and delete devices		
	Remotely control the front panel		
	Add, modify, and delete manager users		
	Assign devices to manager users		
	Modify number of inputs and outputs		
	Local live view and PTZ control		
	There can only be one administrator. The user name is "admin". It cannot be modified. The default password is 1234.		
Manager	The manager has reduced menu access:		
	Remotely control the front panel		
	Add, modify, delete operator and custom users		
	Assign devices to operator and custom		
	Local live view and PTZ control		
	Only the manager can add operator and custom users.		
	Each manager has their own list of operator and custom users.		
Operator	The operator only has access to the remote control of DVR/NVR front panels.		
Custom	The customized user only has access to the remote control of DVR/NVRs front panel.		

#### Table 4: User levels

## Logging in/out

1. Power up the keypad. The following display appears:

User Login			
User Name Password	admin ****		
Save Password	Login	ł	

2. Select your user name from the drop-down list (admin, manager, operator/custom) and enter the password.

**Note**: Record your password in a safe place. If you should forget your password, you will not be able to access the keypad functions. Please contact technical support for assistance.

- 3. Check **Save Password** to save the login password for future use.
- 4. Click **Login**. The main screen for the user type appears with the list of menu options available displayed.

Note: The list of menu options available will depend on the user type.

#### To log out of the system:

1. Click the **Logout** button in one of the configuration screens.

Language Screen Verify Maintenance	MAC Address:	00:40:30:11:11:ca	
Logout			Retu

You return to the Login screen.

## Menu overview

Not all user types have permission to access all menu functions.

Menu function	Description		
1. Keypad	<b>Keypad management</b> : View the device version, configure network parameters, configure hardware settings, set date and time, select the language, calibrate the touch screen, upgrade the system, and import/export a configuration file.		
	Only available to the Admin. See "Keypad management" on page 24 for more information.		
2. Device	Device management: Add, modify, and delete a device.		
3. User	<b>User management</b> : Add and delete a user, add and delete devices associated with a user, and change the password.		
4. Input	<b>Input settings</b> : Start local live view, change camera name/ number/ protocol/ stream type, and group cameras.		
5. Output	<b>Output settings</b> : Display output channels of user, play back recordings, modify an output channel, and group outputs.		
6. Macro	Macro settings: Set up a sequence of actions. Add, view, run, and delete a macro.		
7. Playback	<b>Playback recordings</b> : Playback recordings from a USB flash drive or FTP site through a decoder.		
8. Advanced	<b>Advanced settings</b> : Set AUX1 and AUX2 keys to bidirectional audio and snapshots. Modify network performance and PTZ speed. Set up FTP server settings.		
9. Shutdown	Log out, reboot, and shutdown the system.		

# Keypad configuration via the web browser

You can quickly and easily configure remotely the keypad via a web browser. The main menu functions available depend on the type of user: Administrator, Manager, or Operator/Customized user.

This chapter provides an overview on configuring the keypad via a browser. For further information on how to configure by the different user types, see:

- Administrator: "Local keypad configuration by the Administrator" on page 24.
- Manager: "Local keypad configuration by the Manager" on page 45.
- Operator and Customized user: "Local keypad configuration by the Operator and Custom users" on page 52.

## Login

To access the keypad, open a web browser and enter the IP address assigned to the keypad as a web address. In the Login window, enter the Admin user name and password.

Admin User ID: admin Password: 1234 IP address: 192.168.1.70 Subnet mask: 255.255.255.0 Port: 8000

Menu pane	1	Setup window	

## **Keypad management**

This menu is only accessible by the Administrator.

You can configure all the keypad parameters from the browser by clicking **Keypad** in the submenu panel and entering the required parameters. Click **Save** to save the changes. See Figure 8 below.

For information on setting up keypad parameters locally, see "Keypad management" on page 24.

#### Figure 9: Device Management window

#### Add a device

- 1. Click **Device Management** in the submenu panel. The "Device Management" window appears.
- 2. Click the Add button. In the pop-up window, add the device name, IP address, port, as well as user name and password. Click OK to confirm.

The successfully added device is then listed in the Device Management window.

#### Modify a device

1. In the "Device Management" window, click 2 for the selected device. In the pop-up window, enter the new device name. Click OK to confirm.

#### Delete a device

1. In the "Device Management" window, click is for the selected device. Click OK to confirm the deletion of the user.

### **User management**

The Administrator and Manager can use the browser to add, delete, and change the user parameters. The Operator/Custom users can modify their passwords.

**Note**: Only the Administrator can create Managers. However, only Managers can create Operator and Custom users

See Figure 10 on page 17. For further information on setting up user parameters, see "User management" on page 35.

- 3. Select the desired devices and click the **Add** button to add the devices to the selected user. The successfully added devices are then added to the "User-Device" window.
- 4. To delete a device from the list, click keep for the device you want to delete.

## Input settings

The Administrator and Manager can modify inputs, such as cameras, from the browser. Click **Input** in the submenu panel to get the Input window. See Figure 11 on page 19.

Cameras can also be grouped together so that they can be called up to appear together on a specific monitor. For example, one group can be cameras viewing the car park and another group can be cameras viewing the building entrances.

You can set up to 16 camera groups.

For further information on setting up input parameters, see "Input settings" on page 49.

#### Figure 11: Input window

#### Modify an input

1. In the "Input" window, select a camera from the list and click 2. The "Input" Settings-Modify Input" pop-up window appears.

Camera Name:	IPCamera 31			
Camera No.:	1		(Specify the number between 1 and 999999)	
Protocol:	ТСР	•		
Stream Type:	Main Stream	•		
Device:	PTZ			
IP Address:	172.5.1.87			
Port:	8000			

2. Modify the input's name, protocol number, and stream type. Click **OK** to accept.

#### Set up a camera group

- 1. In the "Input" window, click the **Group** button. The "Input Settings-Input Group" window appears.
- 2. Select the desired group number from the Group No. drop-down list.

oup N	lo.: 1	-	)			Delete	Add Camera
	no.	comero tranie	Device	Туре	IP Address	Port	Delete
	1	IPCamera 31	PTZ	IP PTZ	172.5.1.87	8000	2
	2	IPCamera 31	PTZ	IPC	172.5.1.89	8000	2

3. Click the Add Camera button. The "Input Settings-Add Camera" window appears.

Group (	No.: 1	-				Delete	Add Camera
	No.	Camera Name	Device	Туре	IP Address	Port	Derete
	1	IPCamera 31	PTZ	IP PTZ	172.5.1.87	8000	2
	2	IPCamera 31	PTZ	IPC	172.5.1.89	8000	2

4. Select the desired cameras that you want to group together. Click **Add** to accept the changes and return to the "Input Group" window. The list of successfully added cameras to the group is shown.

## **Output list**

The Administrator and Manager can modify the parameters of outputs such as monitors, decoders, DVRs, and NVRs. Click **Output** in the submenu panel to get the Output window, which displays all the output channels that are accessible by the user currently logged in. See Figure 12 below.

For further information on setting up output parameters, see "Output settings" on page 50.

#### Figure 12: Output window

#### Modify an output channel

1. In the "Output" window, select a camera from the list and click 🧞. The "Output Settings-Modify Input" window appears.

Output Setti	ings Modify Outpu	t	ж
Output No.:	1	(Range from 1 to 999999)	
Output Type:	BNC1		
Device:	DEC		
IP Address:	172.5.1.88		
Port:	8000		
			Ok

2. Modify the output's number. Click **OK** to accept.

#### Set up an output group

- 1. In the Input window, click the **Group** button. The "Input Settings-Input Group" window appears.
- 2. Select the desired group number from the drop-down list.

- 3. Click the Add Output button. The "Add Output" window appears.
- 4. Select the desired outputs to add to the group. Click Add.
- 5. Click **Finish** to return to the "Output Settings-Output List" window to see the list of outputs added to the selected group.

## **Auxiliary functions**

The keypad has AUX1 and AUX2 keys that can be configured for the AUX1 and AUX 2 functions in the system. By default, AUX 1 is set to bidirectional audio and AUX 2 is set to snapshot capture.

The Administrator and Manager can modify the auxiliary settings.

Click Aux Key in the submenu panel to get the Aux Key window. See Figure 13 below.

For further information on auxiliary key set up, see "Bidirectional audio and snapshot settings" on page 42.

Figure 13: Aux Key window

<sup>告</sup> truVision IP Keypa	d			
Version Keypad Device Management User Management Input Output Aux Key FTP	Aux Key Aux Key 1: Aux Key 2: Save	Bidirectional Audio Snapshot	¥ ¥	

## Live view and PTZ speed settings

You can set up the network performance for local live view on the keypad as well as set the PTZ movement speed.

Click **Network Performance** in the submenu panel to get the "Network Performance" window. See Figure 12 on page 20. From the drop-down menu, select the performance level: Least delay, Balanced (default), or Best fluency. Click **Save** to save the changes.

Click **PTZ Speed** in the submenu panel to select a PTZ movement speed level for the connected PTZ camera. There are three levels: Low speed, Medium speed (default), High speed. Click **Save** to save the changes.

For further information on setting up these parameters, see "Live view and PTZ speed settings" on page 43.

## **FTP settings**

You can upload video file and snapshots to an FTP server.

Click **FTP** in the submenu panel to get the FTP window. See Figure 14 below. For further information on auxiliary key set up, see "FTP settings" on page 43.

Figure 14: FTP window

<sup>居</sup> truVision IP Keypad			
Version Keypad Device Management User Management Input Output Aux Key FTP Upgrade Export/Import Config.file PTZ Speed Network Performance System Status Restore Default Reboot Shutdown	FTP Enable FTP: IP Address: User Name: Password: File Pah: Save		

To set up the FTP server settings

- 1. In the FTP window, check the **Enable FTP** box.
- 2. Enter the IP address as well as the user name and password to log in to the FTP server.
- 3. Enter the file path to which the video files and snapshots are uploaded.
- 4. Click **Apply** to save the settings.

## **System status**

Click **System Status** to check the boot time of the keypad as well as the number of different devices connected to the keypad.

truVision IP Keypa	d

Shutdown			

# Local keypad configuration by the Administrator

This chapter describes how the administrator can configure the keypad. The administrator has access to all the keypad functions. The keypad configuration menus are only accessible to the administrator.

Log into the keypad as **Admin** and enter the admin password (see "Logging in/out" on page 11).

## **Keypad management**

#### View the keypad version information

1. In the Main menu, click **Keypad** > **Version**. The "Keypad-Version" window appears:

Keypad Version				
Vorsion Network Hardware Time Language Screen Verify Maintenance	Firmware Version: Encoding Version: Panel Version: Hardware Version:	V1.0.e V5.1 V1.0 0xca00		
Logout			Return	

It lists the current version information of the firmware, encoding, panel, and hardware.

2. Click Return to return to the Main menu or click another Keypad menu option.

#### Configure the keypad network settings

 In the Main menu, click Keypad > Network. The "Keypad-Network Settings" window appears:

Keypad Network Settings				
Version	DHCP:			
Network	Port:	8000		
Hardware	IP Address:	172.5.1.103		
Time	Subnet Mask:	255 . 255 . 255 . 0		
	Default Gateway:	172.5.1.1		
Language	MAC Address:	00:40:30:11:11:ca		
Screen Verify		Apply		
Maintenance				
Logout			Return	

2. Enter the port, IP address, subnet mask, default gateway values.

- Or -

Check the **DHCP** box. Ensure that you have a DHCP server on your network before selecting this option.

- 3. Click Apply.
- 4. Click Return to return to the Main menu or click another Keypad menu option.

#### Hardware settings

1. In the Main menu, click **Keypad > Hardware Settings**. The "Keypad-Hardware Settings" window appears:

2. Enter the desired value for each parameter:

Ра	rameter	Description
1.	Key tone	Key makes a beeping noise when pressed. Enable or disable the option.
2.	Audio warning	Keypad emits warning if the network cable is disconnected. Enable or disable the option.
3.	Key light	Keypad keys are lit red or blue to show if active or locked. Enable or disable the option.
4.	Lock the keypad	Set a timer so that the keypad automatically locks itself after a defined period of inactivity. Select a time between 0 and 10 minutes of inactivity.
5.	Turn off the screen	Set a timer so that the keypad screen automatically turns off after a defined period of inactivity. Select a time between 0 and 10 minutes of inactivity.
6.	Transparency	Set the transparency level between the decoded video and the menu. It only applies to local live view. There are four values to select: 1:1, 3:1, 1:3, or Not transparent.
7.	Mouse speed	Set the mouse speed. Select a level between 0 and 2.
8.	Brightness	Set the screen brightness. Select a level between 0 and 3.

- 3. Click Apply to save settings.
- 4. Click Return to return to the Main menu or click another Keypad menu option.

#### Time and date settings

 In the Main menu, click Keypad > Time Settings. The "Keypad-Time Settings" appears:

Keypad Time Settings					
Version	Date:	2013-08-15 20			
Network	Time:	<pre>(18):(33):(0)</pre>			
Hardware		Apply			
Time					
Language					
Screen Verify					
Maintenance					
Logout		Return			

- 2. Select the desired date.
- 3. Enter the desired time.
- 4. Click Apply to save settings.
- 5. Click Return to return to the Main menu or click another Keypad menu option.

#### Language selection

 In the Main menu, click Keypad > Language Settings. The "Keypad-Language Settings" appears:

2. Select the desired language.

Note: Currently only English is available.

- 3. Click **Apply** to save settings.
- 4. Click Return to return to the Main menu or click another Keypad menu option.

#### Calibrate the keypad touch-screen

The keypad touch-screen needs to be calibrated for it to be correctly positioned.

#### To calibrate the touch-screen:

 In the Main menu, click Keypad > Screen Verify. The "Keypad-Screen Calibration" window appears:

The system displays the calibration instructions; "Click the spots in order" and "Do not click the mouse while calibrating". Click **Calibration**.

2. Using the touch pen, click the three "+" spots that appear on screen.

The message "Screen calibration complete" appears.

3. Click **OK** to complete the calibration.

#### Upgrade the software

There are two ways to upgrade the keypad software:

- Use an FTP server
- Use an USB flash drive

Before you can upgrade the keypad software by FTP, you must first set up an FTP server connection by TFTP or WFTP to transfer the file.

#### To upgrade the software using an FTP site:

1. In the Main menu, click **Keypad > Maintenance**. The "Keypad-Maintenance" window appears:

Keypad Maintenance					
Version	FTP Server:	· · ·			
Network		FTP Upgrade			
Hardware		USB Upgrade			
Time		Config. File			
Language					
Screen Verify		Restore			
Maintenance					
Logout		Return			

- 2. Enter the FTP address and then click FTP Upgrade.
- 3. When the upgrade is successful, the keypad automatically reboots.

If the upgrade fails, an error message appears. Click **OK** to accept.

Hint
Upgrading failed: failed to connect to FTP server.
3 OK

#### Upgrade the software using an USB flash drive:

- 1. Insert the USB flash drive into the keypad slot.
- 2. In the Main menu, click Keypad > Maintenance. The window appears.
- 3. Click USB Upgrade to enter the USB Upgrade window.
- 4. Select the upgrade file from the list and click **Upgrade** to start the upgrade process. The configuration file is *digicap.dav*.

- 3. To import a configuration file:
  - 1) Insert the USB flash drive into the keypad slot.
  - 2) Enter the flash drive and select the file.
  - 3) Click **Import** to import the configuration file.

**Note**: If the imported configuration is invalid, the following error message appears, "Importing file failed: File type does not match."

- 4. To export a configuration file:
  - 1) Insert the USB flash drive into the keypad slot.
  - 2) Click **Export** to import the configuration file.

#### Restore default settings

- 1. In the Main menu, click Keypad > Maintenance. The window appears.
- 2. Click **Restore** to restore the system to default. The following message appears, "Restore Default?"
- 3. Click Yes to continue, or No to cancel the operation.

#### **Device management**

Use this menu to add, modify, or delete a device on the keypad. You can also set up the keypad to remotely control a DNR or NVR.

The "Device-Device List" window lists all the devices that are in communication with the keypad. See Figure 16 on page 30.

You can add devices to the keypad either by searching for all the devices available in the same subnet, or by doing a manual search.

#### Add a device manually

1. In the Main menu, click **Device**. The "Device-Device List" window appears. Click the **Add Device** button.

uto Search	D	evice Device	e List		Add Device
Type De	evice Name	IP Address	Port	Status	Mouny anel

2. In the window that appears, enter the device name, device IP port, user name, and password. Click **Add** to add the device.

**Note**: If the information is invalid or the device is offline, the following error message appears, "Failed to add device."

#### Modify the device name

1. In the Main menu, click **Device**. The "Device-Device List" window appears.

Auto Search Device Device List Add						Add Device
	Туре	Device Name	IP Address	Port	Status	Modify Panel
	IP PTZ	PTZ	172.5.1.87	8000	Connect	
	IPC	IP CAMERA	172.5.1.89	8000	Connect	

2. Click for the device you want to modify. The "Device-Modify Device" window appears.

3. Modify the device name. Click Modify to accept the changes.

**Note**: The user name and password refer to those required to log in to the device from the keypad.

#### Delete a device

- 1. In the Main menu, click **Device**. The "Device-Device List" window appears.
- 2. Select the device to be deleted. Click 💴
- 3. Click **Yes** in the pop-up window to confirm the deletion.

#### Remotely control a DVR/NVR

You can remotely control a DVR or NVR through the keypad. There are two ways to remotely control a device:

- Use the remote panel of the keypad.
- Use the MON key to connect directly to a DVR/NVR. This method may be easier to use when there are several DVRs/NVRs connected to the keypad.

You can call up a specific output DVR or NVR by entering its output device number and pressing the MON key. The output device number associated with a DVR or NVR is shown in the "Output Settings-Output List" window (see "Output settings" on page 38 for more information). A DVR or NVR can have a maximum of two monitors connected to it. See Table 5 for an example on how to call up the desired monitor of a DVR accessible by the keypad.

Keypad keys to press	DVR	Monitor			
#1 MON	1	А			
#2 MON	1	В			
#3 MON	2	А			
#4 MON	2	В			

Note: Not all DVRs/NVRs support remote control.

#### To remotely control a DVR/NVR using the keypad MON key:

1. Press the **Num + MON** keys to call up the monitor of the desired DVR or NVR. The Shortcuts window appears.

You can use the keypad keys as well the shortcut buttons displayed to control the DVR or NVR.

## Local live view

A full-screen overlay of local live view from the selected camera appears on the keypad display.

There are two ways to see local live view on the keypad display. You can use the Input menu as well as using the keypad keys. For instructions on using the keypad keys, see "Local live view" on page 54.

#### To see local live view using the Input menu

1. In the Main menu, click Input. The "Input Settings-Input List" window appears.

5. Select a file for playback from the list and click the **Playback** button to play back the file.

**Note**: You can also do instant playback. See "Instant playback" on page 61 for more information.

# **User management**

You can set up the keypad so that a user can access specific devices, such as cameras.

#### Add a user

1. In the Main menu, click User. The "User-User List" window appears.

User User List Add User					
User Name	User Type	Device	Modify	Login	Delete
admin	Administrator		- <b>%</b>		
4					
Total 1 users					
Logout					

- 2. Click the Add User button. The "User-Add User" window appears.
- 3. Select the user type: Manager, Operator, or Custom.

Note: Only the administrator can add managers.

- 4. Enter the user name and password. Verify the password.
- 5. Click Add to add the user to the system.

#### Set up a user to access a specific device

- 1. In the Main menu, click **User**. The "User-User List" window appears.
- 2. Select the desired user and click Rev. The "User-Device" window appears.
- 3. Click the Add Device button.

4. In the window that appears, select the desired devices and click **Add** to add the device to the selected user.

The successfully added devices are then added to the "User-Device" window.

User Device							
User:	test1	~		Add Device	2

#### Modify a user password

- 1. In the Main menu, click User. The "User-User List" window appears.
- 2. Click for the desired user. The "User-Change Password" pop-up window appears.
- 3. Enter the new password and verify it. Click **OK** to accept.

#### Delete a user

- 1. In the Main menu, click **User**. The "User-User List" window appears.
- 2. Click 💼 for the desired user.
- 3. Click **Yes** in the pop-up window to confirm the deletion.

# **Camera settings**

Use this menu to configure inputs such as cameras.

You can set up the keypad to live view camera images. Cameras can also be grouped together so that they can be called up to appear together on a specific monitor. For example, one group can be cameras viewing the car park and another group can be cameras viewing the building entrances.

You can set up to 16 camera groups.

#### Modify a camera's information

- 1. In the Main menu, click Input. The "Input Settings-Input" window appears.
- 2. Click of the desired camera. The "Input Settings-Modify Camera" window appears.

Inpu	t Settings Modify Camera
Camera No.	1
Camera Name	IPCamera 31
Protocol	TCP
Stream Type	Main Stream
Device	PTZ
IP Address	172.5.1.87
Port	8000
OK	Cancel

Enter the camera number, camera name, protocol, and stream type. Click OK.
 Note: The camera number must be between 1 and 999,999.
 Note: Managers can also modify camera information.

#### Set up a camera group

- 1. In the Main menu, click Input. The "Input Settings-Input" window appears.
- 2. Click the **Input Group** button. The "Input Settings-Input Group" window appears.
- Select the desired group number from the Group No. drop-down list.
   Up to 16 camera groups can be added.

			Input S	ettings	Jengut (	Group	Add	Camera

Add					Finish

- 5. Select the desired cameras that you want to group together. Click Add.
- 6. Click **Finish** to return to the Input Group window. The list of successfully added cameras to the group is shown.

# **Output settings**

Use this menu to configure outputs such as monitors, decoders, DVRs, and NVRs.

You can display in the "Output Settings" window all the output channels that are accessible by the user currently logged in.

You can also playback files from the output channel, such as a DVR or NVR.

#### Display the list of output channels

1. In the Main menu, click **Output**. The Output Settings-Output window appears.

$\square$			Output Se	ettings Output	: List	Output Group

5. Select the desired outputs to add to the group. Click Add.

6. Click **Finish** to return to the "Output Settings-Output List" window to see the list of outputs added to the selected group.

# Macro settings

A macro is a sequence of steps or commands. When you run a macro, the steps programmed into the macro are performed. You can add up to 128 macro commands. There can be up to a maximum of six numbers in a macro command.

Note: Local decoding and live view are currently not supported.

#### Add a macro

- 1. In the Main menu, click Macro. The "Macro Settings-Macro List" window appears.
- 2. Click the Add Macro button.

The "Input Settings-Output Group" window appears.

- 3. Enter the macro name. Then press the **MAC** key on the keypad to enter the text box in the display window.
- 4. Click Add to add the current macro command.

#### Manage a macro

1. In the Main menu, click **Macro**. The "Macro Settings-Macro List" window appears. All the current macro commands are listed.

Macro Settings Macro List				d Macro
No.	Macro Name	View	Run	Delete
1	1			1

2. Click one of the icons to view, run, or delete the selected macro command:

Macro icon	Description
**	Click to view a macro command.

- 3. Select a network performance level for live view; Least Delay, Balanced (default), or Best Fluency.
- 4. Select a PTZ movement speed level for the PTZ camera; Low Speed, Medium Speed (default), or High Speed.
- 5. Click Apply.

#### **FTP settings**

You can upload video files and snapshots to an FTP server.

#### To set up the FTP server settings:

- 1. In the Main menu, click Advanced. The "Advanced Settings" window appears.
- 2. Click **FTP Settings** to view the FTP Settings window.
- 3. Check Enable FTP box.

**Note**: If the option is left unchecked, video files and snapshots will be saved on the USB flash drive.

- 4. Enter the IP address as well as the user name and password to log in to the FTP server.
- 5. Enter the file path to which the video files and snapshots are uploaded.
- 6. Click **Apply** to save the settings.

# Log out of the keypad

- In the Main menu, click Shutdown. Select Logout. The pop-up window appears, "Logout of the system?"
- 2. Click Yes to confirm, or No to cancel.

# Reboot the keypad

- In the Main menu, click Shutdown. Select Reboot. The pop-up window appears, "Restart of the system?"
- 2. Click Yes to confirm, or No to cancel.

## Shutdown

- In the Main menu, click Shutdown. Select Shutdown.
   The pop-up window appears, "Shut down the system?"
- 2. Click Yes to confirm, or No to cancel.

# Local keypad configuration by the Manager

The Administrator must first set up the Managers as users.

# Logging in/out

#### To log into the system:

1. Power up the keypad. The "User Login" window appears:

User Login				
User Name	admin	-		
Password	****			
Save Password	~			
	Login			
		¥		

- 2. Select your user name from the drop-down list and enter the password.
- 3. Check **Save Password** to save the login password for future use.
- 4. Click **Login**. The main screen for the user type appears with the list of menu options available displayed.

Note: The list of menu options available will depend on the user type.

#### To log out of the system:

1. Click the **Logout** button in one of the configuration screens.

Language Screen Verify Maintenance	MAC Address:	00:40:30:11:11:ca	
Logout			Retu

You return to the Login screen.

# **Display list of accessible devices**

The Administrator assigns the devices that can be accessed by users with Manager rights.

#### To display list of accessible devices

1. In the Main menu, click **Device**. The "Device-Device List" window appears with the list of devices available to the user.

b Device Device List						
Туре	Device Name	IP Address	Port	Status Panel

5. Select a file for playback from the list and click **Playback** to play back the file.

# **User management**

Only the Administrator can create Managers. However, only Managers can create Operator and Custom users.

#### Add a user

- 1. In the Main menu, click User. The "User-User Lists" window appears.
- 2. Select the user type: Operator or Custom.
- 3. Enter the user name and password. Confirm the password.
- 4. Click Add to add the user to the system.

#### Set up a user to access a specific device

- 1. In the Main menu, click User. The "User-User List" window appears.
- 2. Select the desired user and click 
  . The User-Device window appears.
- 3. Click the Add Device button.

4. In the window that appears, select the desired device and click **Add Device** to add the device to the selected user.

The successfully added device is then added to the "User-Device" window.

## Input settings

Use this menu to configure inputs such as cameras.

Managers can group cameras together so that the cameras can be called up to appear together on a specific monitor. For example, one group can be the cameras viewing the car park and another group the cameras viewing the building entrances.

You can set up to 16 camera groups.

#### Modify a camera's information

- 1. In the Main menu, click Input. The "Input Settings-Input" window appears.
- 2. Click on the desired camera. The "Input Settings-Modify Camera" window appears.

Input	t Settings Modify Camera
Camera No.	1
Camera Name	IPCamera 31
Protocol	TCP
Stream Type	Main Stream
Device	PTZ
IP Address	172.5.1.87
Port	8000
OK	Cancel

Enter the camera number, camera name, protocol, and stream type. Click OK.
 Note: The camera number must be between 1 and 999,999.

#### Set up a camera group

- 1. In the Main menu, click Input. The "Input Settings-Input" window appears.
- 2. Click the Input Group button. The "Input Settings-Input Group" window appears.
- 3. Select the desired group number from the Group No. drop-down list.

Up to 16 camera groups can be added.

			Input S	ettings	Jenut Group	Add	Camera
Group	No.:	1					
No.	Name		Device	Туре	ddress	Port	Delete

4. Click the Add Camera button. The "Input Settings-Add Camera" window appears.

	Ir	nput Setting	ıs Add C	Camera	ĸ
No.	Name	Device	Туре	IP Address	Port
1	IPCamera 31	PTZ	IP PTZ	172.5.1.87	8000

Total 2 item	s Page	e 1/1	<b>I4 - I</b>	▶ N To <b>∢</b> 1	► P →
Add					Finish

- 5. Select the desired cameras that you want to group together. Click Add.
- 6. Click **Finish** to return to the Input Group window. The list of cameras successfully added to the group is shown.

# **Output settings**

Use this menu to configure outputs such as monitors, decoders, DVRs, and NVRs.

You can display in the "Output Settings" window all the output channels that are accessible by the user currently logged in.

You can also playback files from the output channel, such as a DVR or NVR.

For instructions on setting up outputs, see "Output settings" on page 38.

# **Macro settings**

A macro is a sequence of steps or commands. When you run a macro, the steps programmed into the macro are performed. You can add up to 128 macro commands. There can be up to a maximum of six numbers in a macro command.

For instructions on setting up and using macros, see "Macro settings" on page 40

# Playback files from an encoder

Video files stored in an encoder can be played back through the related decoder. There are two ways to play back the files:

- Files located on a USB flash drive
- Remote playback

For instructions on doing playback from an encoder, see "Playback files from a recorder" on page 41.

# **Advanced settings**

Use this menu to configure FTP settings, the AUX key, live view performance, and the PTZ control speed control settings.

For instructions setting up bidirectional audio and snapshots using the AUX settings, live view, PTZ speed control, FTP, see "Advanced settings" on page 42.

# Log out of the keypad

1. In the Main menu, click Shutdown. Select Logout.

The pop-up window appears, "Logout of the system?"

2. Click Yes to confirm, or No to cancel.

# Reboot the keypad

- In the Main menu, click Shutdown. Select Reboot.
   The pop-up window appears, "Restart of the system?"
- 2. Click Yes to confirm, or No to cancel.

### Shutdown

- In the Main menu, click Shutdown. Select Shutdown.
   The pop-up window appears, "Shut down the system?"
- 2. Click Yes to confirm, or No to cancel.

# Local keypad configuration by the Operator and Custom users

Operators and customized users can login to the system and see the list of accessible devices. They can also change their password.

# Logging in/out

1. Power up the keypad. The following display appears:

User Login			
User Name Password		oper1	
Save Password		~	
	¥	Login	

- 2. Select your user name from the drop-down list and enter the password.
- 3. Check **Save Password** to save the login password for future use.
- 4. Click **Login**. The main screen appears with the list of menu options available displayed.

# **Display list of accessible devices**

The Administrator assigns the devices that can be accessed by users with Manager rights. Managers can then assign their devices to operators and customized users.

1. In the Main menu, click **Device**. The "Device-Device List" window appears with the list of devices available to the user.

ہ Device Device List				
Туре	Device Name	IP Address	Port	Status Panel

		Apply	
Logout			Return

- 2. Enter the current password and the new one. Confirm the new password.
- 3. Click **Apply** to accept the changes

# Shutdown

- In the Main menu, click Shutdown. Select Shutdown.
   The pop-up window appears, "Shut down the system?"
- 2. Click Yes to confirm, or No to cancel.

# Using the keypad

This chapter shows you how to use shortcut operations, display video on a monitor from one or a group of cameras, use instant playback, and record. It also describes how to use tours, presents, preset tours, and shadow tours.

# Using shortcut operations

Use shortcut operations to quickly access many keypad functions. A shortcut is a sequence or combination of keystrokes on the keypad that invokes commands in the software.

You must be logged into the keypad in order to carry out a shortcut operation.

Figure 17: Shortcut window description

In local live view mode, the window (WIN), camera group (CAM-G), multiview (MULT), and camera tour (TOUR) and functions are unavailable.

An error message will appear in the Hint box of the shortcut screen when an invalid action is entered.

# Local live view

A full-screen overlay of local live view from the selected camera appears on the keypad display. It is not possible to use a multiview format.

There are two ways to see local live view on the keypad display. You can use the Input menu and the keypad keys. For instructions on using the Input menu, see "Local live view" on page 33.

You can carry out shortcut actions to live view.

#### To access local live view:

- 1. Press 0 + MON to enter local live view mode.
- 2. Enter the camera number Num and press CAM.

**Note**: Window (WIN), camera group (CAM-G), multiview (MULT), and camera tour (TOUR) functions are not available in local mode.

3. Press ESC to enter full-screen mode.

# Display decoded video on a monitor

This section describes how to display video on a monitor when using a decoder.

#### **Multiview display**

Depending on the decoder used, you can display the video on the selected monitor in full-screen mode as well as in 2X2 multiview format.

When in multiview mode, you can easily switch a selected video tile to full-screen mode and back again as well as turn audio on and off. See Figure 18 below.

#### Figure 18: Multiview control icons

#### To view in full-screen or multiview mode:

- 1. Press the Num + MON keys to select the monitor.
- 2. Press the Num + MULT keys to select the multiview mode for the monitor.

	Shortcuts
MON 2	
CAM	
2	
Hint:	MULT
Hint:	

**Note**: If you enter 0 + MON in live view mode, multiview mode is not supported as video is then displayed on the keypad.

#### Display a specific camera on a monitor

You can select which camera to display on a monitor.

#### To display a specific camera on a monitor:

- 1. Press the Num + MON keys to select the monitor.
- 2. Press the Num + WIN keys to select the video tile to be displayed on the monitor

— Or —

Directly touch the keypad window to select the desired video tile.

3. Press the Num + CAM keys to select the camera.

For example, press 1+MON, 2+WIN, 3+CAM to decode the video signal from Camera 3 and display it on Video tile 2 of Monitor 1.

#### Set up a camera group to display on a monitor

You can use a decoder to configure the keypad to display the images from a camera group on a monitor.

When the number of cameras in a group is less than or equal to the number of video tiles on-screen (for example three cameras and four video tiles), each camera is then displayed on its corresponding time (for example, camera 1 on video tile 1, camera 2 on video tile 2...)

When the number of cameras in a group is more than the number of video tiles onscreen (for example 16 cameras and 4 video tiles), the cameras are displayed in the following sequence mode: cameras 1 to 4 are displayed on video tiles 1 to 4, next cameras 5 to 8 on video tiles 1 to 4, cameras 9 and 12 are displayed on video tiles 1 to 4, and finally cameras 13 to 16 on video tiles 1 to 4.

Note: The default dwell time is 30 seconds.

An error message will appear in the Hint box of the shortcut screen when an invalid action is entered.

To view a camera group on a monitor:

- 1. Press the Num + MON keys to select the monitor.
- 2. Press the **Num + CAM-G** keys to select the camera group to be decoded and displayed on the monitor.

**Note**: If you enter 0 + MON in live view mode, multiview mode is not supported as video is then displayed on the keypad.

#### Set up a camera group to display in the keypad window

The video signal from the camera group can be outputted to and displayed on the selected window of the monitor in cycle.

Note: The default dwell time is 30 seconds.

An error message will appear in the Hint box of the shortcut screen when an invalid action is entered.

#### To view a camera group on a monitor:

- 1. Press the Num + MON keys to select the monitor.
- 2. Press the **Num + WIN** keys, or directly touch the keypad window, to select the display window.
- 3. Press the **Num + CAM-G** keys to select the camera group to be decoded and displayed on the monitor.

For example, press 1+MON, 2+WIN, 3+CAM-G to decode the video signal from Camera group 3 and display it on video tile 2 of Monitor 1.

**Note**: If you enter 0 + MON in live view mode, multiview mode is not supported as video is then displayed on the keypad.

#### Set up a camera group to display on a monitor group

You can configure the keypad to display the images from a camera group on a group of monitors through a decoder.

When the number of cameras in a group is less than or equal to the number of video tiles on-screen (for example eight cameras and nine video tiles), each camera is then displayed on its corresponding time (for example, camera 1 on video tile 1, camera 2 on video tile 2...)

When the number of cameras in a group is more than the number of video tiles onscreen (for example 16 cameras and 4 video tiles), the cameras are displayed in the following sequence mode: cameras 1 to 4 are displayed on video tiles 1 to 4, next cameras 5 to 8 on video tiles 1 to 4, cameras 9 and 12 are displayed on video tiles 1 to 4, and finally cameras 13 to 16 on video tiles 1 to 4.

Note: The default dwell time is 30 seconds.

An error message will appear in the Hint box of the shortcut screen when an invalid action is entered.

#### To view a camera group on a monitor group:

- 1. Press the Num + MON-G keys to select the monitor group.
- 2. Press the **Num + CAM-G** keys to select the camera group to be decoded and displayed on the monitor group.

	Shortcuts	
MON-G 1		
CAM-G 1		
	CAM-G	_
Hint:		

**Note**: In monitor group mode, output channels are only displayed in full-screen mode by default.

#### Set up a tour

A tour is the display of images from a sequence of different cameras. You can set up to 64 cameras in a tour.

The dwell time is the time a camera image remains on-screen before the image from the next camera is displayed. The default dwell time is 30 seconds but it can be modified.

Tour setups are not saved when the device is restarted.

An error message will appear in the Hint box of the shortcut screen when an invalid action is entered.

To set up a tour:

- 1. Press the **SET** key to enter the tour shortcut window.
- 2. Press the Num + TOUR keys to set up a tour.
- 3. Press the **Num + ENTER** keys to set up the dwell time of the selected camera and camera number.

Shortcuts	Set: TOUR 2 Dwell Time: 2 CAM:
Hint:	ENTER

4. Repeat step 3 for each camera to be included in the tour.

Note: The tour parameters are cleared if you the Num + TOUR keys again.

5. Press the **SET** key to complete the tour settings.

Up to eight tours can be set.

#### Call up a tour

- 1. Press the Num + MON keys to select the monitor.
- 2. Press the **Num + TOUR** keys to call up a programmed tour to be displayed on the monitor.

#### Set up a group tour

You can set up a group tour so that multiple camera groups can be displayed on specific monitors. Each user account can set up to eight tour groups. Each tour group can contain up to eight camera groups to specific monitors.

Caution: Group tour setups are not saved when the keypad is rebooted.

A group tour cannot be set up in playback mode.

To set up a group tour:

- 1. Press the **SET** key to enter the group tour shortcut window.
- 2. Press the Num + GROUP keys and set up a group tour.
- 3. Press the Num + ENTER keys and set the monitor number.
- 4. Press the Num + ENTER keys and set the camera group (CAM-G) number.

Shortcuts	Set: GROUP 2 Monitor: 2 CAM-G:
Hint:	ENTER

5. Repeat steps 3 and 4 for each monitor and camera group to be included in the group tour.

**Caution**: The tour parameters are cleared if you press the **Num + GROUP** keys again.

6. Press the **SET** key to complete the group tour settings.

#### Call up a group tour

You can use a group tour to call up multiple camera groups on specific monitors. For example, call up camera group 1 appears on monitor 1, and camera group 2 appears on monitor 2. The dwell time of the group tour can also be modified.

If multiple camera groups have been set up to appear on the same monitor, then the monitor only displays the last programmed camera group.

#### To call up a group tour:

1. Press the Num + GROUP keys to call up the programmed group tour.

Shortcuts	
	Switch Group2
Hint:	GROUP

# Instant playback

Use the keypad to quickly replay recorded video from the previous five seconds.

Administrators and Manager scan also play back video from the Input menu. See "Playback a file" on page 33 for more information.

#### To instantly playback a video:

- 1. Press the Num + MON keys and select the monitor.
- 2. Press the Num + WIN keys and select the video tile.
- 3. Press the Num + CAM keys and select the desired camera.
- 4. Press the key to enter instant playback window.

5. Press the • key to stop playback.

# **Auxiliary functions**

The keypad has AUX1 and AUX2 keys that can be configured for the AUX1 and AUX 2 functions in the system. By default, AUX 1 is set to bidirectional audio and AUX 2 is set to capture a snapshot.

**Note**: An error message appears if an AUX function is requested when the current window is in cycle view mode.

#### **Bidirectional audio**

#### To start bidirectional audio with a decoder/NVR/DVR:

- 1. Press Num and MON and select the decoder/NVR/DVR.
- 2. Press the AUX1/AUX2 key that is configured to the bidirectional function to start bidirectional audio.

Note: The keypad takes the bidirectional audio from the nearest device.

#### To start bidirectional audio with a camera:

- 1. Press Num and CAM and select the camera.
- 2. Press the AUX1/ AUX2 key that is configured to the bidirectional function to start bidirectional audio.

#### During bidirectional audio:

- Stop bidirectional audio by pressing 0 + AUX1/ AUX2
- If the network connection is lost during directional audio, press 0 + AUX1/AUX2 to stop the bidirectional audio and then restart it.
- If the system is in cycle view mode and you want to play bidirectional audio for a specific camera, you must quit cycle view mode by pressing ESC. Then press the Num + CAM keys and press AUX1/AUX2 key to start bidirectional audio.

#### Snapshots

You can use the keypad to capture a snapshot of a video image and save it on a USB flash drive or upload it to an FTP server. To upload snapshots to an FTP server, you must already have configured the system for the FTP server.

There are two ways to capture a snapshot. You can do it from the output channel or the input channel.

**Note**: An error message appears when the keypad window is configured to display cameras in cycle view mode.

#### Method 1: To capture a snapshot

- 1. Press the Num + MON keys and select the monitor.
- 2. Press the Num + WIN keys and select the video tile.
- Press the AUX key that has been configured for snapshot capture (AUX 1 or AUX 2) to capture the snapshot.

#### Method 2: To capture a snapshot

- 1. Press the Num + CAM keys and select the input channel.
- 2. Press the center button of the joystick to capture the snapshot.

# Saving recordings

You can record video from the cameras and save the files to a USB flash drive or upload it to an FTP server. You cannot record video during playback.

The REC key on the keypad is lit red during recording.

**Note**: An error message appears on-screen when the keypad window is configured to display cameras in cycle view mode.

There are two ways to record video:

#### Method 1: To record video

- 1. Press the Num + MON keys and select the monitor.
- 2. Press the Num + WIN keys and select the video tile.
- 3. Press the **REC** key to start recording.

#### Method 2: To record video

- 1. Press the Num + CAM keys and select the input channel.
- 2. Press the **REC** key to start recording.

## Moving to next/previous cameras

You can easily select the next or previous cameras when carrying out a shortcut operation.

**Note**: An error message appears on-screen when the keypad window is configured to display cameras in cycle view mode.

#### Method 1: To move to the next or previous camera

- 1. Press the Num + MON keys and select the monitor.
- 2. Press the Num + WIN keys and select the video tile.
- 3. Press the PREV or NEXT key and select the previous or next camera.

**Note**: This method only works if the current window is in dynamic decoding mode.

#### Method 2: To move to the next or previous camera

- 1. Press the Num + CAM keys and select the input channel.
- 2. Press the **PREV or NEXT** key and select the previous or next camera.

# **Operating PTZ cameras**

You can control PTZ dome cameras using the keypad. If the camera supports PTZ functions, you can use the joystick as well as the Focus, Iris, and Zoom keys on the keypad to control the camera.

# Setting a preset

Presets are previously defined locations of a PTZ dome camera. They allow you to quickly move the camera to a desired position.

An error message will appear in the Hint box of the shortcut screen when an invalid action is entered.

There are two ways to set a preset:

#### Method 1: To set a preset using an output channel

- 1. Press the Num + MON keys and select the monitor.
- 2. Press the Num + WIN keys and select the video tile.
- 3. Using the joystick, move the PTZ camera to the desired position.
- 4. Press the **Num + PRESET** keys and enter the preset number to set the current position as a preset.

#### Method 2: To set a preset using an input channel

1. Press the Num + CAM keys and select the camera.

Note: The action 0 + CAM is invalid.

- 2. Using the joystick, move the PTZ camera to the desired position.
- 3. Press the **Num + WIN** keys and enter the preset number to set the current position as a preset.

	Shortcuts	
CAM 17		
	×	Set Preset: 2
Hint:	_	

# Calling up a preset

There are two ways to call up a preset:

#### Method 1: To call up a preset using an output channel

- 1. Press the Num + MON keys and select the monitor.
- 2. Press the Num + WIN keys and select the video tile.
- 3. Press the Num + CALL keys and enter the desired preprogrammed preset.

	Sh	ortcuts	
MON 1	CAM		
CAM	CAM		Call Preset: 1
1		2	
CAM	CAM		
3		4	
			CALL
Hint:			CALL

#### Method 2: To call up a preset using an input channel

1. Press the Num + CAM keys and select the camera.

**Note**: The action **0** + **CAM** is invalid.

2. Press the Num + CALL keys and enter the desired preprogrammed preset.

# Setting a preset tour

Preset tours move a PTZ dome camera to a sequence of steps. The camera stays at a step for a set dwell time before moving on to the next step. A step consists of a step number, a dwell time, and a speed.

The step number is the order the camera will follow while cycling through the preset tour. The dwell time is the length of time that a camera stays at a step before moving to the next step. The speed is the rate at which the camera will move from one step to the next.

A preset tour requires at least two presets.

The PTZ dome camera must be able to support preset tours.

An error message will appear in the Hint box of the shortcut screen when an invalid action is entered.

There are two ways to set a preset tour:

#### Method 1: To set a preset tour using an output channel

- 1. Press the Num + MON keys and select the monitor.
- 2. Press the Num + WIN keys and select the video tile.
- 3. Press the SET key to enter the Settings window.
- 4. Press the Num + PATROL keys to enter the "Preset Tour Settings" window.
- 5. Enter the preset number and press **ENTER**, enter the dwell time (called "Stop Time on-screen) and press **ENTER**, and then enter the speed and press **ENTER**.

6. To set the next preset in the tour, repeat step 5.

**Note**: To clear all programmed parameters, press the **Num + PATROL** keys again.

7. Press the SET key again to complete the preset tour.

#### Method 2: To set a preset tour using an input channel

1. Press the Num + CAM keys to select the camera.

Note: The action 0 + CAM is invalid.

- 2. Press the **SET** key to enter the Settings window.
- 3. Press the Num + PATROL keys to enter the Preset Tour Settings window.

4. Enter the preset number and press **ENTER**, enter the dwell time (called "Stop Time on-screen) and press **ENTER**, and then enter the speed and press **ENTER**.

		Shortcuts		
MON 1 CAM CAM	1	CAM 1 CAM X	Set: PATROL 1 Preset: Stop Time: Speed:	5 5 30
Hint:	_		ENTE	R

5. To set the next preset in the tour, repeat step 5.

**Note**: To clear all programmed parameters, press the **Num + PATROL** keys again.

6. Press the SET key again to complete the preset tour.

# Calling up a preset tour

There are two ways to call up a preset tour:

#### Method 1: To call up a preset tour using an output channel

- 1. Press the Num + MON keys to select the monitor.
- 2. Press the Num + WIN keys to select the video tile.
- 3. Press the **Num + PATROL** keys and enter the desired preprogrammed preset tour.

#### Method 2: To call up a preset tour using an input channel

- 1. Press the Num + CAM keys to select the camera.
- 2. Press the Num + PATROL keys to enter the desired preprogrammed preset tour.

Shortcuts	
CAM 1	Run Patrol: 1
Hint:	PATROL

# Setting a shadow tour

A shadow tour is a camera path that was manually-controlled. It has a beginning and end. You can set a camera to move between two points such as two locations in a car park. Only one shadow tour can be set up.

The PTZ dome camera must be able to support shadow tours.

There are two ways to set a shadow tour:

#### Method 1: To set a shadow tour using an output channel

- 1. Press the Num + MON keys and select the monitor.
- 2. Press the Num + WIN keys and select the video tile.
- 3. Press the **SET** key to enter the Settings window.
- 4. Press the Num + PATTERN keys and set the shadow tour number.

- 5. Using the joystick, move the PTZ camera through the desired positions.
- 6. Press the **SET** key again to complete the shadow tour.

#### Method 2: To set a shadow tour using an input channel

- 1. Press the Num + CAM keys and select the camera.
- 2. Press the SET key to enter the Settings window.
- 3. Press the Num + PATTERN keys and set the shadow tour number.

Shortcuts	
CAM 1	Set: PATTERN 1
Hint:	PATTERN

- 4. Using the joystick, move the PTZ camera through the desired positions.
- 5. Press the SET key again to complete the shadow tour.

# Calling up a shadow tour

The PTZ dome camera must be able to support shadow tours.

There are two ways to call up a shadow tour:

#### Method 1: To call up a shadow tour using an output channel

- 1. Press the Num + MON keys and select the monitor.
- 2. Press the Num + WIN keys and select the video tile.
- 3. Press the Num + PATTERN keys to call up the shadow tour number.

Method 2: To call up a preset tour using an input channel

- 1. Press the Num + CAM keys and select the camera.
- 2. Press the Num + PATTERN keys to call up the shadow tour number.

# **Specifications**

Control mode	Control mode:	IP-based
Audio input/output	Line In:	1-ch, 3.5 mm connector (2.0 Vp-p, 1 k $\Omega$ )
	Audio Out:	1-ch, 3.5 mm connector (Linear, 600 $\Omega$ )
External interface	Communication interface:	1 RJ45 10M/100M/1000M adaptive Ethernet interface, PoE
		1 RS-232 interface
		1 RS-485 interface
		1 USB2.0 interface (for data storage and device upgrade)
General	LCD screen:	7" TFT LCD monitor with touch panel
	Joystick:	3-axis joystick
	Power supply:	12 VDC
	Power consumption:	≤15 W
	Working temperature:	-10 to +55°C (14 to 131 °F)
	Working humidity:	10 to 90%
	Size (H × W × D):	110 × 193 ×435 mm (4.33 × 7.59 × 17.12 in.)
	Weight:	2 kg (4.4 lb.)
